The Coordination Committee formed by GR No. Abhyas - 2116/(Pra.K ra.43/16) SD - 4 dated 25.4.2016 has given approval to prescribe this textbook in its meeting held on 20.6.2019 and it has been decided to implement it from academic year 2019-20.

Download DIKSHA App on your smartphone. If you scan the Q.R. Code on this page of your textbook, you will be able to access full text. If you scan the Q.R. Code provided, you will be able to access audio-visual study material relevant to each lesson, provided as teaching and learning aids.
WE, THE PEOPLE OF INDIA, having solemnly resolved to constitute India into a SOVEREIGN SOCIALIST SECULAR DEMOCRATIC REPUBLIC and to secure to all its citizens:

JUSTICE, social, economic and political;

LIBERTY of thought, expression, belief, faith and worship;

EQUALITY of status and of opportunity; and to promote among them all

FRATERNITY assuring the dignity of the individual and the unity and integrity of the Nation;

IN OUR CONSTITUENT ASSEMBLY this twenty-sixth day of November, 1949, do HEREBY ADOPT, ENACT AND GIVE TO OURSELVES THIS CONSTITUTION.
NATIONAL ANTHEM

Jana-gana-mana-adhînâyaka jaya hê
Bhârata-bhâgya-vidhîtâ,

Panjâba-Sindhu-Gujarâta-Marâthâ
Drâvida-Utkala-Banga

Vindhya-Himâchala-Yamunâ-Gangâ
uchchala-jaladhi-taranga

Tava subha nâmê jâgê, tava subha âsîsa mâgê,
gâhê tava jaya-gâthâ,

Jana-gana-mangala-dâyaka jaya hê
Bhârata-bhâgya-vidhîtâ,

Jaya hê, Jaya hê, Jaya hê,
Jaya jaya jaya, jaya hê.

PLEDGE

India is my country. All Indians are my brothers and sisters.

I love my country, and I am proud of its rich and varied heritage. I shall always strive to be worthy of it.

I shall give my parents, teachers and all elders respect, and treat everyone with courtesy.

To my country and my people, I pledge my devotion. In their well-being and prosperity alone lies my happiness.
My Dear Friends,

I warmly welcome you to Eleventh Standard. From the Educational academic year (2019-2020), you will experience the newly structured curriculum for the optional subject Education.

Education is the independent subject, in this subject you will be introduced with different branches like Educational Sociology, Educational Psychology, Educational Administration and Educational Research. The subject Education is having its own Philosophy, Psychology. As gradually the study of education progresses you will come to know that every subject is being inculcated in it. It will help to understand the educational process in which you are engaged.

Education is considered as a very advanced, developing and research based educational branch. In human life the educational process and its related learning-teaching-evaluating procedure and research procedure is having extra-ordinary importance.

This is delightfull that you are being introduced to Education subject, through this textbook. Through this textbook you will experience new views from every chapter. From the chapter. You will know the meaning of education stated by the Indian and western thinkers. Our education system has a strong philosophical foundation laid by various thinkers and reformers. You will understand their contribution in various fields of education. Education is a sub-system of a society. Society needs to contribute in the progress of education and education should lead society, progressively. Only social reformers’ and thinkers’ contribution is insufficient for social progress, so each component of society should contribute. You should understand the interdependence of society and education. You need to have insight of education, hence learning about various aspects of education e.g. teaching, learning, administration, management etc. are necessary. Be a part of progressive changes by understanding new trends in education. Know yourself and your sorrounding by understanding educational psychology and study habbits to gain knowledge and sucess.

I hope this textbook of subject Education will give inspiration. From your reading and doing given activities and project aicsivities, you should study deeply and thoroughly. The QR code is given on the front page for experiencing the joy of Digital Book.

I wish all the very best to you for your educational progress !!!

(Preface)

Pune
Date : 20 June 2019
Bharatiya Saur Dinank : 30 Jyeshtha 1941

(Dr. Sunil Magar)
Director
Maharashtra State Bureau of Textbook Production and Curriculum Research, Pune
For Teachers..........

- The main purpose to teach education subject is to how make the learners aware, 'Education' process is going on and how all round development does takes place through education. Hence the teacher should keep in mind the above purpose to teach the 'Education' subject.

- Teacher should study the various definitions of education given by educational thinkers as well as explain through own experiences and also promote the learner to share their experiences.

- At the time of teaching, teacher should explain the importance and contribution of educational thinkers in present situation. While explaining the life sketch, educational thoughts and contribution teacher should discuss the educational, social and political situations at the relevant time. Collect the data about the educational thinker through internet, reference books and film etc.

- The teacher should enhance students to participate in actual social life through discussion method and also explain the contribution of education in social change and its problem solving and to understand the co-relation between society and education.

- Teacher should explain with proper examples about adolescense, physical and mental changes, and problems during adolescence. Teacher should also give detail information about educational psychology.
Eleventh and Twelth standards are the foundation of two years of higher education. During these two years students decides the direction of their life. You will be taking initiative in explaining the importance of administration and management for the success of education system which plays vital role in student’s life.

While teaching the pedagogy teacher should use the variety of teaching methods, principles, theories and maxims. So that student can understand the theory with practice. Besides that students will know various learning aids and will know how to use them.

Through 'Educational Research' chapter teacher should explain the concept, need and importance of educational research. Teacher should explain the subject in easiest way by giving various examples and to promote their research attitude through projects.

While teaching the new trends in education teacher should give the information about tools of e-learning, mass media, video-conferencing online shopping etc. Teacher should also explain the importance of cyber security by collecting and showing the news from newspapers and television.

Through the chapter 'Study for Knowledge' teacher should bring to their attention concept of proper study habits and importance of it in success.

Use the pictures, diagrams, tables given in the book to motivate learner's thinking power. Also try to make the learner more active, reflective and reactive.

   1.3.3.1 Features of Informal Education
   1.3.3.2 Importance of Informal Education
   1.3.3.3 Components of Informal Education

Let’s Tell

- What characteristics do you find among the students from nursery to 10th Std.?
- Do you behave now in the same way as you used to behave in your childhood?
- State the major differences of your behaviour.

During our childhood, we were very sportive, naughty and stubborn. However as we grow, this sportiveness, naughtiness and stubbornness goes on reducing. As per our new experience, we go on changing our actions, our nature and our behaviour. This change in behaviour is called education.

Try to understand from the following chart, what changes are brought about due to education. Apart from the examples given there, add your own experiences in the blank boxes given in the chart.

1.1 : Changes occurring due to Education
An English word "Education" has been derived from Latin word "Educare" which means 'to bring up', 'to lead out' or 'to draw out'. Hence education means to nurture or to help in expressing the hidden qualities or talent. The Marathi word 'Shikshan' is derived from the Sanskrit word 'Shiksh' which means to preach.

**1.1 Concept of Education**

Education is a comprehensive process. It will be easier for us to understand nature of education, if we consider various definitions of education put forth by Indian and Western educational thinkers.

**1.1.1 Indian Educational Thinkers**

- "Education is the manifestation of the perfection already in man".  
  - Swami Vivekananda
- "By education I mean an allround drawing out of the best in child and man - body, mind and spirit".  
  - Mahatma Gandhi
- "Education means the expression of the self".  
  - Rabindranath Tagore
- "Education is the instrument for social, economical and cultural change, it is not only for information, but for knowledge that becomes wisdom. True education is value laden and it searches for truth".  
  - Dr. S. Radhakrishnan

**1.1.2 Western Educational Thinkers**

- "Education is the perfect development of excellence in human body and soul".  
  - Plato
- "Education is the development of sound mind in a sound body".  
  - Aristotle
- "Education is the development of inner natural activities and powers of a child".  
  - Rousseau
- "Education is a process of living life with continuous reconstruction of experiences".  
  - John Dewey

What similarities do you find in the definitions of education put forth by Western and Indian Educational Thinkers?

**1.2 Levels of Education**

- Higher Education (Undergraduate and Post graduate)
- Higher Secondary Education (Std. XI and XII)
- Secondary Education (Std. IX and X)
- Upper Primary Education (Std. VI to VIII)
- Lower Primary Education (Std. I to V)
- Pre-Primary Education (Age 3 to 6 years)

**1.2.1 Primary Education**

Primary Education is considered to be basic or fundamental education. It is divided into two stages. The stages from Std. I to Std. V is known as Lower Primary Education, and the stage from Std. VI to VIII is known as the Upper Primary Education.

According to 'Right to Education Act' (RTE) throughout India, the free, compulsory and universal primary education for children in the age group of 6 to 14 years is mandatory. In order to create interest in education among children, primary education has been structured in child-centred mode. The Government has been implementing various schemes like Mid-day Meals, Free uniforms, free Textbooks, Scholarships, Reservations etc. for
economically and socially backward sections so that no child should remain deprived of primary education.

As per 'Right of Children to Free and Compulsory Education Act, 27 August 2009 the government has been entitled the responsibility of providing free, compulsory and universal primary education to all the children in the age group of 6 to 14 years. It also includes the responsibility of providing them admission in schools, to retain their attendance in schools and to get their primary education completed.

Let's Tell

Shubham has completed his free and compulsory education. So, till which level has he completed his education?

- **General Objectives of Education at Primary Level**
  - At primary Level, to develop the basic language skills namely listening, speaking, reading and writing both in mother tongue and English.
  - At upper primary level, to develop basic language skills in mother tongue to high extent and to reinforce the basic language skills in Hindi and English.
  - To develop scientific attitude and basic scientific skills like observations comparison, classification, experimentation, drawing inferences and presentation.
  - To develop skills regarding, Information and Communication Technology.
  - To introduce Indian Cultural traditions and geographical and cultural diversity.
  - To create awareness regarding social rights and responsibilities along with cooperation and tolerance.
  - To inculcate the spirit of individual and social responsibility regarding environment protection and conservation.
  - To create the awareness regarding Dignity of Labour among students.
  - To develop physical health of students and inculcate hygienic habits among them.
  - To cultivate the various aesthetic skills among students.
  - To create the spirit of entrepreneurship.
  - To develop various life skills.
  - To create awareness regarding problems like regionalism, superstition, population growth, pollution, terrorism, corruption etc.

**1.2.2 Secondary and Higher Secondary Education**

The education provided at Std. IX and X is recognized as secondary education, whereas education provided at Std. XI and XII is known as Higher Secondary Education. The Higher Secondary Education is also referred as Junior College Education.

As per Indian Constitution, Education comes in the concurrent list, which means it comes under both State and Union Government List. Hence Education becomes the responsibility of both State and Union Government. Therefore, the national level general curriculum framework is prepared by NCERT i.e. National Council of Educational Research and Training, New Delhi. After that the MSCERT i.e. Maharashtra State Council of Educational Research and Training develops the appropriate school education curriculum based on the National Curriculum Framework.

In state of Maharashtra, the state level institute Maharashtra State Bureau of Textbook Production and Curriculum Research, Pune ('Balbharati') (Located at Pune) looks after the responsibility of writing, editing, printing and distributing the textbooks from Std. I to Std. XII, and the responsibility of conducting the examinations for Std. X and Std. XII is shouldered by Maharashtra State Board of Secondary and Higher Secondary Education. This board has nine regional boards throughout Maharashtra.

Internet My Friend

Find out the list of regional boards of Maharashtra State Board of Secondary and Higher Secondary Education through internet.

Do You Know?

According to recommendations made by Dr. Mudliyar Secondary Education Commission (1952-53) and Dr. Kothari Indian Education Commission (1964-66) in
Maharashtra, the reconstruction of Secondary Education was implemented from June 1972. After that from 1975 the new pattern known as 10+2+3 was accepted in the whole state. According to this pattern the first ten years denoted secondary education, followed by next two years of higher secondary education and the next 3 years are for undergraduate education.

- **General Objectives of Education at Secondary and Higher Secondary Level**
  - To develop the competencies of observation, finding similarities, verifying finding through inferences and stating theory etc.
  - To develop skills regarding information and communication Technology.
  - To develop essential life skills to get self employment.
  - To activate them for environment protection and conservation.
  - To inculcate the values of freedom, equality, justice, brotherhood and respect for diversity among the students.
  - To develop the competencies among students of moral and psychological strengths, ability to think independently, and an ability to face the forces harmful to social values.
  - To develop the competencies to grasp the present in the light of past and vision for future.
  - To introduce the social and economic challenges of the nation.
  - To introduce the strength of Indian Culture.
  - To create the awareness regarding Globalization, Localization, Privatization, and Modernization and their mutual inter dependence.
  - To create awareness about protection of public property and cultural heritage.
  - To create the awareness of empowerment of women and weaker sections of society.
  - To inculcate the values of unity in diversity, secularism, social harmony and equality.
  - To create the awareness about developing and consuming natural resources collectively and wisely.

Discuss the salient features of the general objectives of primary education and secondary and higher secondary education.

**1.3 Types of Education**

According to imparting and receiving education, there are three types of education. They are known as formal education, non-formal education and informal education.
1.3.1 Formal Education

Formal education is provided through educational institutes like school, college or university. The aims of formal education are pre-planned. The institutes of formal education are created out of the need and necessity of individual and society.

Formal Education can be called as education which is imparted in a preplanned and systematic way by a particular system which is goal directed. Formal education is well planned and systematically structured education.

A student has to be enrolled in an educational institution. He/She has to select the course of his/her choice. He/She has to follow certain rules and discipline. He/She has to keep himself aware about the purpose of his/her education, and has to attend the classes to receive the learning experiences.

1.3.1.1 Salient Features of Formal Education

- Formal education is imparted through schools, colleges, universities and vocational educational institutes.
- Formal education is scientific, systematic, and pre-planned.
- Curriculum, time table, teaching methods, students, teachers, management etc. are having the importance in formal education.
- Teaching and learning are intentional processes.
- The things like 'examinations', 'pass', 'fail', 'degrees' are quite important.
- Rules and discipline have importance.
- This education has more importance in practical life.

1.3.1.2 Importance of Formal Education

- The educational requirements of society are fulfilled by formal education.
- Formal education enables the learner to think scientifically, and to look at the life logically.
- As this education is imparted in formal institutions like schools, colleges, universities; any problems of the students are solved immediately in the institutions only.
- In formal education, the students and teachers work together hence according to the learning experience of student, teaching strategy can be changed, so the goal of education can be fulfilled.
- In formal education, a student gets a definite period of time to achieve excellence in a particular subject. Then his achievement is evaluated in an examination process. After achieving excellence student is awarded with a degree or certificate. This enhances his confidence.
- Formal education system enables us to identify the talents from students as expert, administrators, engineers, teachers, doctors or creative artists.

Collect information and discuss

- Collect the information through internet regarding ancient Indian educational system practised in Gurukuls.
- Discuss in your group the educational interaction between mentor and disciple in Gurukul educational system.

1.3.1.3 Components of Formal Education

Following are the components of formal education.
1.3.2 Non-formal Education

Non-formal Education is complementary to formal education. In this mode of education one can learn in his free and convenient leisure time. In non-formal system of education one need not follow the restrictions as in case of formal education, like attending the school regularly, following the fixed timetable and completing the syllabus in given duration and so on. Hence one can achieve education even while doing the job or profession or household work.

1.3.2.1 Salient Features of Non-Formal Education

- In case of Non-formal education, the teacher and student are many times apart from each other or they are at a distance for most of the times.
- Non-formal education is imparted through either open education institutes or mass media.
- Non-formal education enables one to develop knowledge and skills.
- Non-formal education is the bridge between formal education and informal education.
- In, non-formal education, examination and certificates and degrees, has an important place.

1.3.2.2 Importance of Non-formal Education

- Non-formal education is a great boon to those persons who were unable to get education through formal mode of education due to lack of time.
- Non-formal education enables one to utilize the leisure time.
- The certificates or degrees received through Non-formal education are also useful in obtaining jobs or getting promotions in jobs.
- Non-formal education provides us opportunity for nurturing our hobbies.

Let’s Tell

Kalpana has completed her primary education. She is not able to continue her secondary education in a school. Now from which institute can she complete her remaining education?

1.3.2.3 Components of Non-Formal Education:

The components of non-formal education are as following:

- Board of Open Schooling
- Open Universities
- Library
- Computer
- Mass Communication Media
- Teachers
- Students

1.6 : Components of Non-formal Education
1.3.3 Informal Education

Education is a continuous process. Every moment we get the new experiences. Through these experiences change in behaviour takes place. This is called as informal education.

In our life, we don't get all education through school and college. We get many experiences from our family, friends, society etc. i.e., like to dress up our shirt, to draw rangoli, to use right hand for eating, to greet others etc. This list will be endless. These skills we have learnt from our family, friends, peers without going to school; therefore this type of education is called as informal education.

1.3.3.1 Salient Features of Informal Education

• It is not stereotyped.
• There is no preplanning in it.
• There is no specific purpose.
• It is spontaneous education without any formality.
• Both teachers and learners are not involved in any purposeful activity.

1.3.3.2 Importance of Informal Education

• Informal education is very important for getting life skills and value education.
• As there is no restriction of any kind, it becomes joyful education.

Let's Tell

Narrate what kind of experiences and skills did you get from informal education.

1.3.3.3 Components of Informal Education

Following are the components of Informal Education:

Components of Informal Education

- Family Environment
- Friends
- Discussions
- Picnics
- Internet
- Cultural Programmes
- Camps
- Periodicals
- TV
- Communities

1.7 : Components of Informal Education
Q. 1. (A) Rewrite the sentences by using proper alternatives given in the brackets.

(1) According to its Latin word, Education means..................
   (a) To pick up  (b) To understand
   (c) To bring up  (d) To learn

(2) Which of the following alternatives does not include in the concept of education?
   (a) Development of physical, mental and intellectual abilities.
   (b) Knowledge enrichment, change in behaviour, acquiring skills.
   (c) To make individual selfish, superstitious and fatalist.
   (d) To make individual self dependant and self less.

(3) Formal education includes..........
   (a) To take education from school, college, universities.
   (b) To take education through curriculum, timetable, teaching-learning, examination, degree etc.
   (c) alternative 'a' and 'b'
   (d) To take education through various experinces of day-to-day life.

(B) Match the following from Columns A, B, and C

Q. 2. Answers in one or two words

(1) Levels of Primary Education
   1. ............................
   2. ............................

(2) Types of Education
   1. ............................
   2. ............................
   3. ............................

(3) Objectives of Non formal Education
   1. ............................
   2. ............................
   3. ............................

Q. 3 Complete the activity.

1. State the components of formal education.

2. Complete the following flow chart to state the different Levels of Education

   - Secondary Education
     - (Std 6------to Std 8------)
   - Lower Primary Education
     - (Std------to Std------)

Q. 4 Answer the following questions.

1. Which schemes are implemented by the government in order to create an interest in primary education?
2. What is the importance of formal Education?
3. State the salient features of informal education.

Q. 5 State your opinion.

1. Non-formal Education is complementary to formal education.
2. Which values are reflected through the definitions of education proposed by the Indian educational thinkers?
3. What might be the reasons of changing objectives of education from primary to secondary and then to higher secondary levels?

Q. 6 Complete the following activities.

1. Observe the behaviour of the children in a nursery school and write a brief report.
2. Make a list of activities implemented for child centric education through formal education.
Introduction

Education is an effective means of social change. The role of education is to streamline the cultural and social views of society. Educational thinkers spread educational thoughts through their conduct and ideas of education to common people. In the present unit we shall introduce you to some educational thoughts of the dignified educational thinkers in Maharashtra.

Every one gets inspiration from the educational contribution and from the thoughts of the educational thinkers and get a proper direction for educational work. These thinkers have the valuable ideas from their own uninterrupted hard work, continuous thinking, actual experiments and from profound experiences, which always guide us.

In this unit introduction of educational thoughts of following educational thinkers are given, like Mahatma Jotirao Phule who first laid the foundation of women's education in Maharashtra, Maharshi Dhondo Keshav Karve who dedicated whole life for redemption of women and women education, Karmaveer Bhaurao Patil who established many schools, colleges and hostel facilities for students in Maharashtra, Dr. Panjabrao Deshmukh who established 100 educational centers in Amravati district for providing free and compulsory education and Anutai Wagh who started the education of children through various play-way methods for Tribal people in Kosbad.
2.1 Mahatma Jotirao Phule

Let's Tell

Vidyavina Mati geli | Mativina Niti geli | Nitivina Gati Geli | Gativina Vitta Gele | Vittavina Shudra Khachale |
Etake Anartha Eka Avidyene Kele

The meaning of above mentioned quotation is as follows:
"Lack of education, Leads to lack of wisdom.
Lack of wisdom, Leads to lack of morals.
Lack of morals, Leads to lack of progress.
Which leads to oppression of down trodden.

These disasters only increase because of illiteracy.

From the above views of Mahatma Phule, state the bad effects of illiteracy.

Mahatma Jotirao Phule laid the foundation for women's education in Maharashtra. Along with women's education he worked for the education of the backward classes. In 1873, Mahatma Jotirao Phule, established the 'Satyashodhak Samaj' (Society of Seekers of Truth) to attain equal rights for men and women and spread of education. In 1882 in front of the Hunter Commission, Mahatma Phule proposed that compulsory and free education for all Indians from rich and poor, should be provided by the government. A similar application was submitted to the Duke of Cannought, the representative of Queen Victoria in 1888.

2.2: Educational Contribution of Mahatma Phule

2.1.3 Mahatma Jotirao Phule:
Educational Thoughts.

- Education is the support of life.
- Primary education should be compulsory and free for all.
- Follow up for Women's education is needed.
- Focus on vocational and technical education.
• Scholarship and hostel facilities should be provided for education of students.
• For quality education recruitment of trained teachers.
• Instead of clerical education, provide entrepreneurship and livelihood Education.
• Education enables to identify the difference between good and bad.
• Education is important for social reform.

Do You Know?

2.3 : Brief Life Sketch of Maharshi Dhondo Keshav Karve

Considering "Women Education" as worship of God; Maharshi Dhondo Keshav Karve devoted his life for women education. Maharshi Dhondo Keshav Karve, worked for education for minor girls, orphan girls and
adult women. Maharshi Karve, established orphanages Women's University and many educational institutions. Maharshi Karve used to consider the women's education as service to nation. Maharshi Karve believed that education should be given in mother tongue. At the same time, he highlighted the importance of English language. Along with theoretical knowledge, the curriculum should imbibe education through various games, dance, music, painting, construction, work experience, etc. He brought social reform by establishing Women's University.

2.4 : Educational Institutes established by Maharshi Dhondo Keshav Karve

#### Peep in History

From the related reading about Japanese Women's University and visiting that University, Maharshi Karve presented the concept of Women's University. With the financial assistance from Vitthaldas Thackersey, Women's University was named as S.N.D.T. (Shreemati Nathibai Damodar Thackersey) which is located in Mumbai, as well as in Pune.

Shrimati Nathibai Damodar Thackersey was mother of Shri Vitthaldas Thackersey. He donated 15 lakh rupees to this university in memory of his mother.

#### 2.2.3 Maharshi Dhondo Keshav Karve : Educational Thoughts

- The means of improvement of society is education.
- Establishment of educational institutions is a sacred task.
- Medium of education should be mother tongue.
- Women's education is considered as worship of god.
- There should be diversity in the curriculum that means various subjects should be available as options.
- Education is important for self reliance.
- Educating society is serving for Nation.
- Subjects like science and technology should be taught in English.

To eradicate evil practices like Child Marriage, Domestic Violence, Obstructive customs, women education is the only option.

### 2.3 Karmveer Bhaurao Patil

#### Let's Tell

Who started the scheme of 'Earn and Learn' in Maharashtra?

2.5 : A Brief Life Sketch of Karmveer Bhaurao Patil
Being inspired by Chhatrapati Rajarshi Shahu Maharaj and Mahatma Jotirao Phule, Karmaveer Bhaurao Patil established Rayat Shikshan Sanstha at Satara. Education reached every corner of Maharashtra, with the whole hearted efforts of Karmaveer Bhaurao Patil. Karmveer Bhaurao Patil had decided the picture of 'Banyan Tree' as a logo of the organization. To make education available from primary education to college education, the educational institutions were introduced with various faculties like Arts, Commerce, Science, Education, Law, Engineering. Bhaurao Patil in the real sense was a great reformer. That is why he gave opportunity to hardworking and intellectual people in his organization. The advantage of this was many doctors, lawyers, professors, teachers, social workers, graduates in modern agriculture became qualified from rural areas.

List the work of Rayat Shikshan Sanstha spread in various districts in Maharashtra with the help of internet.

Karmaveer Bhaurao Patil established hostel at Nerale, Walva Taluka in 1921. In this hostel students belonging to all castes and religions lived together along with untouchables. To avoid the burden of expense of food on a single person, an innovative scheme was introduced called as Mushtifund. (A woman grinding grains using stone grinder, would keep a handful of grains in a bag which would be collected by students and teacher of the hostel under the Mushtifund. This is also called a Zoli Yojana).
2.3.3 Karmaveer Bhauroa Patil: Educational Thoughts

- Education through self dependence.
- Self-respect through education and prestige through self-respect.
- Education for the upliftment of society.
- Education is the tool of character building.
- Education for multiple objectives
- Teacher should be leader and gramsevak of the village.
- Need of hostel for educating everyone together.
- Concept of education for various streams and disciplines.

Karmaveer Bhaurao Patil believed that students should work hard on their potentials and should acquire education. Therefore he decided 'Self-reliant Education is our motto' as a slogan for Rayat Shikshan Sanstha.

Let's Understand

Using internet, collect and present the information of Rayat Shikshan Sanstha.

2.4 Dr. Panjabrao Deshmukh

- Who was the first Indian Minister of Agriculture?
- Who is the founder of Shree Shivaji Shikshan Sanstha in Vidarbha?

2.7 : Brief Life Sketch of Dr. Panjabrao Deshmukh

2.4.2 Dr. Panjabrao Deshmukh : Educational Contribution

- In 1932, Shree Shivaji Shikshan Sanstha was established.
- By increasing the revenue of district council, he opened 100 free and compulsory education centres in Amravati.
- Establishment of hostel within the school in Shri Shivaji Shikshan Sanstha for providing education in Amravati.
• He opened many colleges in Vidarbha for Bahujan Samaj students from the education.
• To eradicate, ignorance, backwardness, poverty, unhealthy and socio-economic inequality in rural areas, Shree Shivaji Shikshan Sanstha, Gandhi Gram Udyog Mandir, Kasturba Medical And Welfare Center were established
• Founded Rural Institute to revolutionize education
• Curriculum beneficial to women was framed by Shree Shivaji Shikshan Sanstha.
• At Amravati, started C.P.Ed. course for Physical Education and started the Physical Education College.
• Established Shri Shivaji Lok Vidyapeeth in the 1950.
• After becoming the Agriculture Minister of India in 1952, he established “Bharat Krishak Samaj” for use of Modern Technology in agriculture.
• He initiated many activities like adult education, gram organizer class, one to two years agricultural courses, Gandhi Gram Udyog Mandir etc.
• Through the medium of 'Rural Institute'; independent technical institutes established in 1956, Junior College of Science and Vocation, Agricultural Science Diploma, Animal Husbandry and Dairy, Panchayat Raj Centre, Gramsevak Training Centre, several centres like Anganwadi Sevika Kendra were started.

He founded the hostel adjacent to the secondary schools of Shri Shivaji Institute of Shikshan Sanstha with the thought that students could get the facility of hostel. Many colleges were started in Amravati for higher education for boys and girls from rural area in Vidarbha.

2.4.3. Dr. Panjabrao Deshmukh :
Educational Thoughts
• Hostel facilities should be made available for students taking secondary education.
• University education should focus on creating nationalist who would serve the society or the country instead of merely creating bookish scholars
• Traditional and outdated education system should be replaced by socially-oriented education.
• Education is useful for eradicating, backwardness, poverty, illiteracy and socio-economic inequality in rural areas.
• Everyone should take care of physical health.
• Agriculture must be supported by modern technology. Agriculture education should reach the farmers through exhibitions, seminars and conferences.

Dr. Panjabrao Deshmukh devoted his life for the bringing the under-developed society more and more into the main stream of education. For the upliftment of the under developed society, he established many schools and colleges and the Rural Institutes.
2.5 Anutai Wagh

2.9 : Brief Life Sketch of Anutai Wagh

Under the able guidance of Tarabai Modak, Anutai Wagh brought revolutionary change in the history of child education through experimentation in education. Anutai gave education to the adivasi children in Kosbad, Tal. Dahanu, District. Palghar in Tribal Area through play way method (games). During the period between 1949 to 1956 Anutai started in all 15 Aanganwadis. She provided employment to adivasi people through vocational education. Under the guidance of Dr. Chitra Naik, she started various training programmes for Gramsevika, Balsevika and Anganwadi. The educational work of respected Tarabai Modak was faithfully continued by Anutai Wagh.

2.10 : Anutai Wagh :
Educational Contribution

2.5.3 Educational Thoughts of Anutai Wagh

• Considering the restless nature of child, he should be dealt with tactfully,
• Education should be given through games and playway method.
• Generating employment through work experience education.
• Education through rhymes and stories.
• Pre-primary education should be managed through experimentation.
• For enjoyable education, childrens toys should be used.
• Use of materials available in the surrounding should be used as educational material to provide effective education.

Anutai Wagh worked for child education selflessly throughout her life. She introduced the concept of Balwadi as an option for Montessori school. She managed Adivasi Education by living directly with them. She arranged many training programs for teachers of Kindergarten (Aanganwadi and Balwadi).

She started 10 creches, 11 Balwadis, 4 Pre-primary schools, 30 adult education institutions, nights schools, teacher's training schools, meadow schools (kuran shala), schools for deaf and dumb, Stree Shakti Jagruti Sanstha in Bordi, Kosbad and Thane. At that time Bordi, Kosbad became the laboratory of Adivasi Education. She dedicated her whole life for the welfare of Adivasis.

• **Literary work of Anutai Wagh**

  Anutai Wagh wrote about her educational concept, methods and experiments in books. She wrote following books-
  • Balwadi Kashi Chalwavi
  • Kuran Shala
  • Vikasachya Margawar (Series)
  • Sakas Aahar Geete
  • Sahaj Shikshan
  • Balwaditil Goshti (Nursery Stories)
  • Badbad Gite (Nursery Rhymes)
  • Kruti gite (Activity Songs)
  • Prabodhika etc.

  We have to understand the restless nature of small children, so that we can mould them. Anutai conducted many experiments in the field of education. Anutai has set an ideal example for teaching using tribal settlements for education by actually living with them.

  With the help of internet present the life sketch of Anutai Wagh.

  Make a presentation by collecting information about Tarabai Modak and Gijubhai Badheka.
Q. 1 (A) Select the appropriate answer from the options given below and rewrite the sentence.

(1) Choose the work which is not done by Mahatma Phule from the following .........................
   (a) Presented the thoughts in front of William Hunter Education Commission.
   (b) Established Satyashodhak Samaj.
   (c) Wrote ' Kavya Phule anthology'.
   (d) Taught in Scottish Mission School.

(2) Choose the educational thought of Anutai Wagh out of the following options .........................
   (a) Teach children as per their interest.
   (b) Adopt society oriented teaching methodology.
   (c) Education through Self reliance.
   (d) Alternatives 'b' and 'a'

(3) Identify the wrong pair from the following options.
   (a) Mahatma Phule - the first school for girls
   (b) Maharshi Dhondo Keshav Karve - Professor of Mathematics at Fergusson College
   (c) Karmaveer Bhaurao Patil - Establishment of Satyashodhak Samaj
   (d) Dr. Panjabrao Deshmukh - Emphasis on Residential education

(4) Choose the educational thinker who established the first Women's University from the following .........................
   (a) Anutai Wagh
   (b) Dr. Panjabrao Deshmukh
   (c) Maharshi Dhondo Keshav Karve
   (d) Karmaveer Bhaurao Patil

Q. 1 (B) Correlate and pair the following points given in the column A, B, C

Q. 2 Answer in one or two words

(1) Maharshi Dhondo Keshav Karve was honoured by the following universities with which titles?
   (a) Pune University
   (b) Banaras Hindu Vidyapeeth

(2) Educational Institutes Established by Dr. Panjabrao Deshmukh.
   a) __________________
   b) __________________

(3) What kind of teaching aids were used by Anutai Wagh in child education?
   (a) __________________
   (b) __________________
Q. 3 Answer the following questions
(1) State any three educational thoughts of Maharshi Dhondo Keshav Karve.
(2) Explain in brief about Mushtifund yojana.
(3) State any three educational thoughts of Dr. Panjabrao Deshmukh.

Q. 4 Write the correct answers of following questions.
(a) Mahatma Jotirao Phule:
   (1) Full name
   (2) Honours received
   (3) Educational thoughts

(b) Anutai Wagh:
   (1) Full name
   (2) Inspiration
   (3) Honours received

Q. 5 Answer the following questions.
(1) Write the educational contribution of Mahatma Jotirao Phule.
(2) Write the educational contribution of Dr. Panjabrao Deshmukh.

Q. 6 Complete the following activities.
(1) Visit a nearby pre-primary school and observe the teaching learning process and write a report on it.
(2) Collect information of Rayat Shikshan Sanstha established by Karmveer Bhaurao Patil from the internet.

* * *

Important Points in report writing:

Title: Brief information about the report should be included in the title.
Introduction: In Introduction, include information about objectives, place, types of report.
Main Body: This is the main body of report, hence detailed information, description, classification, structure etc. should be included.
Conclusion: Brief summary must be given. Reflection of self opinion in conclusion is important.
References: Various references are used while writing a report e.g. books, new papers, articles or information from internet. Give a list of these references.

3.1: Different Types of Society

- Which are the differences shown in the above picture?

Let’s Tell

- Tell the social characteristics of Tribal Society.
- Tell the social characteristics of Rural Society.
- Tell the social characteristics of Urban Society.

Remember This

The Special status was given to the Educational Sociology by the Pioneer Educational Sociologist ‘George Payne’ in 1928 through his book ‘Principles of Educational Sociology’. That’s why he is known as Father of Educational Sociology.

---

3.1 Meaning of Educational Sociology

Educational Sociology helps to determine educational objectives. Educational Sociology is one of the branches of education. Main objective of the branch is to make a person social. It is a study of interaction between person and cultural environment. In short, Educational Sociology means the study of correlation and interaction between the various components of school and society.

- “Educational sociology means the analytical process of socialization”
  — Eliwood, Smith, Brown

- “Educational sociology is the science which describes and explains the institution i.e. the social relationship in which the individual gains and organises his experiences.”
  — George Payne
Objectives of Educational Sociology

- To try to make the schools as cultural centres of the society.
- To achieve progress of social development through education.
- To specify the role of teacher in society.
- To explain the place of school in society.
- To specify the need and importance of formal, non-formal and informal education in society.
- To study the effects of social impact on overall development of person.
- To use research methodology and diagnostic approaches to achieve educational objectives.
- To establish healthy relationship between education and mass media.

Characteristics of Educational Sociology

- Educational Sociology is the branch of educational pedagogy.
- Educational Sociology is considered as one of the branches of sociology.
- In Educational Sociology analysis of education is considered as an important part.
- The base of Educational Sociology is taken as a support to decide educational objectives.
- Educational Sociology is the applied sociology.
- Analysis of sociolization process is the basic issue of Educational Sociology.

Functions of Educational Sociology

- To develop modern social methods.
- To do the creative and constructive work.
- To promote social control and social change.
- To help the socialization process.
- To apply the role of media in social change.
- To inculcate democratic culture among people.
- To analyse the reconstruction of society.
- To develop a good citizen in democratic society.
- To study the social relationship and social processes in the context of social development.

Let's Tell

What will happen if a person in society does not get primary education at all?

Search it

- Among print media, mass media and web media, which communication medium is more effective in social change?

Observe and Discuss

3.2 : A person putting thumb

Do You Know?

- ‘Education is essential to develop equality and brotherhood in society.’
- Education can destroy undesirable customs and traditions of society.
- Education can make man understand that good things are to be accepted and bad things are to be rejected.
3.2 Education and Society

Education and society are the two sides of the same coin. Education can help to maintain the unobstructive status of society and to develop the social existence through progressive way. To make the Education system qualitative and useful; all the components of society are equally important. By Taking active participation of society, education can become socially oriented. It is essential to correlate society with education to improve the quality of education.

3.3 Participation of Society in Education

- Make the list of what you see in the following picture no. 3.3

Let’s Recall

- As a student, which type of help had you offered to your own school?
- Which type of help had you offered to your village?
- Write down the name of villages in your surrounding which resolved the water problems by their voluntary labour.
- Write down the names of different organizations and groups which actively participated in tree plantation and forestation?
- Discuss - Why such activities were successful? What are reasons behind it.

3.3 : Various Events
3.3.1 People Participation

Let’s Think

It is a must to take opinion of every citizen about the development of his/her own village, own city or own environment. It is compulsory according to 73rd and 74th Constitutional Amendments of India.

There are many welfare schemes provided by Central Government for cities and villages. These schemes are effectively implemented by the help of citizens.

Discuss

Discuss how the progress of your village/town/city took place.

What is people participation?

School and society are the two indivisible parts. School is for society and society is for school. The primary objective of school is to achieve personal development and ultimately through it the social development. Similarly to develop the school by the help of society is also equally important. This needs people and social participation in schools activity. This is called as ‘people participation.’

Remember it

To increase the people’s participation in development programme and local body decision making process, there should be regular work meetings in urban area and Gram Sabha in rural area.

Collect Information

- Which initiatives had been taken from your school to promote people participation related work?
- Tell us how you will contribute in people participation activities organized by your school/college.
- Which problems did you face while conducting the people participation project in your school? enlist them.

Objectives of ‘People Participation’ in function of School

- To cultivate the co-relation of school and society.
- To increase reliability of school.
- To solve the problems of school.
- To give direction to control over the function of school.
- To get co-operation of society in co-curricular activities of school.
- To receive the economical help for school development.
- To increase the attendance of students in school.
- To enrich school resources through social co-operation.
- To make use of knowledge and experience of senior great scholars in society.

3.3.2 Balrakshak Movement and Samtadoot Project

Balrakshak

‘Balrakshak’ in terms of government system is a person who tries to decrease the ratio of ‘out of school’ children in a sensitive way. To find ‘out of school students’, to awaken their parents and to enroll these types of children in school and given them qualitative education are the main objectives of ‘Balrakshak’

Remember it

- Institutions working for the development of ‘out of school’ students in your surroundings.
- Equality messengers who tries to do work for ‘out of school’ students in your surroundings.
- ‘Out of school’ children and their reason for being out of schools.

Functions of Balrakshak

- To find ‘out of school children.
- Awareness among parents.
- To enroll the ‘out of school’ students in school.
- To try to give quality education to students.
- To help the students to stay firmly in mainstream of education.
- To make students physically and educationally capable.
- To work as a like in between school and society.

3.4 : Functions of Balrakshak
Samtadoot

As per the resolution passed unanimously in the Board of Governors meeting of Dr. Babasaheb Ambedkar Research And Training Institute (BARTI), Pune dated 5th July, 2014.

Objectives of Samtadoot Project
(1) The main objective of this project is to convey fundamental principles mentioned in constitution i.e. social justice, equity, fraternity, liberty and unity.
(2) To make aware about the scheduled castes and the scheduled tribes (Prevention of Atrocities) Act 1989.
(3) To help to get the benefits of government scheme to socially and economically backward and deprived component of scheduled castes.
(4) To eradicate racial malice. To develop social reconciliation and brotherhood.
(5) To do publicity and dissemination of scheme of social justice and Special Assistance Department Services and other government schemes given for scheduled castes people.

3.3.3 Corporate Social Responsibility (CSR)

Different types of schemes and concessions provided by Indian government to Indian Corporate Industries, because of this, it is necessary to expend 2% amount from profit on social issues by the private industries. For this purpose Indian government according to Company Act 2013, article 135; decided the responsibility policy for Industry and company. This act was implemented from 1st of April, 2014 This information will be added by the company in Annual balance sheet.

• Structure of CSR Committee (Maharashtra State)
(1) President - Secretary, School Education and Sports Department.
(2) Member - Commissioner for Education.
(3) Member - Commissioner for Sports.
(4) Member - Director, State Project.
(5) Member - MCI (Medical Council of India) representative.
(6) Member - NGO (Non-govt. organisation) representative and Educational expert.
(7) Member - Secretary / vice secretary, Training department.

Need of CSR Act:
• As a social refund.
• Contribution towards social development through income.
• Awareness social responsibility of large scale industries.

Contribution of CSR
• To find underprivileged students by survey method.
• To help economically poor students for education.
• To provide educational facilities for ‘out of school’ children.
• To increase physical facilities in school.
• To give skill development education to school students.
• To help whole heartedly the innovative schools for qualitative improvement.
• To funding for Innovative Teachers.
• To implement schemes for adopted schools and adopted students.

Keep in mind

It is important to make co-relation between the people of education and industrial field for implementing the CSR plan to qualitative development of education.

3.3.4 NGO’s (Non-Govt. Organization)

Organisations which are registered under society registration Act 1860 and Bombay Public Act. 1950 and working for social welfare are called Non Government Organisation.

Get more information about the function of NGO.
Fill up the list of NGO.

<table>
<thead>
<tr>
<th>Name of the NGO</th>
<th>Functions of NGO</th>
</tr>
</thead>
<tbody>
<tr>
<td>1. .................</td>
<td>1. .................</td>
</tr>
<tr>
<td>2. .................</td>
<td>2. .................</td>
</tr>
<tr>
<td>3. .................</td>
<td>3. .................</td>
</tr>
<tr>
<td>4. .................</td>
<td>4. .................</td>
</tr>
</tbody>
</table>

Choose any five institutions and discuss in your group about their functions/work structure.

Do you know this?

- There are 33 lakh NGOs in our country, which are listed under act?
- There are 4.5 lakh NGO has listed under act in Maharashtra.
- In India every year about 40 to 80 thousand crores of funds are collected by NGO’s.
- There are some universities and educational institutions which run the courses related to NGO management.

Role of NGO in Education

- To increase physical facilities.
- To help economically.
- To make publicity of educational schemes to common people in society.
- To direct actively for the skill development of students.
- To increase the social participation in education.
- To inspire students to involve in different social projects.
- To develop the basic awareness among the students regarding social projects. (eg. environment protection, eradication of superstitions, save a girl child, Sarv Shiksha Abhiyan etc.)

3.4 Learning Society

Think

- Why it is considered that every person of society should learn continuously?

What is the role of ‘learning process’ in one’s life?

You Must Know

The scope of knowledge becomes continuously wider in today’s 21st century. This is computer era and there seems to be an explosion of knowledge. Every person should look forward to get updated knowledge. The concept of education become so wider that we should not even think to get knowledge from only specific institution or social group or specific system. Then what is the remedy for this? As we say that not only every person should be educated but also he/she should learn continuously throughout life. For that every component of society should learn by its own according the need of time. This would ultimately create the learning society.

Objectives of Learning Society

- To achieve progress of society through education.
- To create self awareness among all individuals in society.
- To try to eradicate social and economical inequality of society.
- To correlate the formal and informal education.
- To prepare the responsible citizens for democracy.
- To correlate the education and culture.
- To bring the deprived people in the flow of education.

Every person in society should learn of its own, study new and updated things from society, new points of view, new thinking, scientific attitude. Considering oneself as a life long learning society.

Characteristics of Learning Society

- There is no discrimination in learning society as formal, informal and vocational.
- Because of learning society; deprived people from society can come to the flow of education.
Strategies for Learning Society

Inculcation of new values in society can be done by learning society.

Learning society creates awareness of international understanding.

Learning society helps an individual to raise his status of life.

**Importance of Learning Society:**
- To create cultured society by accepting the modern values.
- To cultivate knowledge centered society on the basis of democracy.
- To develop the values like equal opportunity, self reliance, self dependence and well culturedness.
- To give the equal opportunity for personality development. According to their probabilities/potential.
- To eradicate the gap of inequality.
- For the creation of literate society.
- To create unity from diversity.
- For the creation of a financially self-sufficient society.
- For the creation of a society having scientific attitude based society.
- For clear and free expression.
- To develop a sense of universal citizenship.
- To make aware about the proper use of leisure time.

Strategies of Learning Society as follows:

- Collect the articles, news and pictures from the newspaper which shows the diversity in equality.
- Discuss in group the methods/strategies learning society on your own level.

### 3.5 Multicultural Education

- Enlist the names of different cultures in India.
- Give the short description of culture of your area.
- What do you call a place in which people live with various languages, ethnicity and religion?

**Do you know?**

Variety of languages, religions, traditions, rules and habits are found in community is called multi-culture.

The group in which the people live together with different languages, religions, customs, traditions, rules and habits is known as multicultural society.
From the above description we know that multicultural society is the characteristics of Indian Society. Each and every person of India has the equal right for enriched living in India. For this purpose education provides valuable help. Let us understand the role of education in multicultural society.

**Meaning**

To create flawless and healthy approach for different cultures by introducing various languages, content, literature, festivals, art, lifestyle, religion, customs and traditions, ethics and marriage system to the students through education is known as ‘Multicultural Education.’

Students are supposed to know more about strengths and weaknesses of each culture and evaluate each culture unbiased to play appropriate role in creating cultural integrity.

### Importance and Need of Multicultural Education

- To make students familiar with different cultures.
- To make the capable citizen of multicultural society.
- To enhance the view of students towards broad minded positive attitude for society.
- To inculcate global feeling in students.
- To try to achieve integration from diversity.
- To inculcate the spirit of honouring one’s own culture and other’s culture.
- To develop the skill of living successfully in multicultural society.
- To inculcate the spirit of the cultural exchange in Indian Society.
- To make cultural integration through the principle of unity in diversity in India.
- To give assurance of equal opportunity in secularized environment.

“Education” is an important means of social change. We easily come to know about cultural diversity through education only. The education should be imparted through proper multicultural aspects. It should not be only bookish or scholastic. It should appropriately aim at giving ample scope to inculcation of multicultural values and spirit.

All cultures should be included in Multicultural curriculum. It is necessary to make efforts objectively to present good things in various cultures. Changes in cultures should be guided by a curriculum. There should not be blind following to others culture. For the guidance about the above mentioned things following things should be considered.

- The curriculum for multicultural education should be flexible.
- Multicultural education should be socially oriented.
- To make available the equal opportunity for self development of every students through curriculum.
- The problems and cultural needs of local life of people should be reflected in curriculum.
- The curriculum should be enriched with the personality developing values like cooperation, sensibility, responsible behaviour and spirit of service.
- Student centred methods should be adopted in multicultural education.

3.6 Multicultural Education Curriculum
Such type of multicultural educational curriculum have been practically implemented through documentary, project method, self-quest, problem solving attitude, seminar, debate, discussion. These methods will be useful for the cultural development of students.

**Problems and Recommendations in Multicultural Education**

**Problems**
- Cultural conflict
- Prejudiced attitude.
- Social inequality.
- Lack of cultural awareness.
- Lack of multicultural teaching strategies/methods.
- Different sources to get multicultural education.

**Recommendations**
- Teacher, school and educational institutions should contribute through essential environment developed by multicultural education, organisation and lecture methods to avoid cultural conflicts in society.
- Teachers should give respect to every culture and each elements of culture in multicultural society. There should not be any prejudices regarding any element of culture. Then only we can develop sensible citizens for multiculturalism.
- Students can encounter the ‘unity in diversity’ among various cultures if such cultural programs reflecting the unity are organized. Such a unity has to be identified in multicultural situation. This would help in developing the spirit that “We all are one!”.
- To motivate different cultural elements for getting education, to enhance the dynamic cultural society, to promote the syllabus which will transform, culturedness, to make society dynamic, organisation of workshop, seminars, discussion sessions for positive awareness of multiculturalism in students.
- The teacher who has thorough knowledge of multiculturalism and who has taken training to give skills, abilities and views to the society of multiculturalism.
- The teacher will try to contribute for making multicultured citizen by using proper teaching strategies to learn multiculturalism.
- The teacher should think about the cultural background of students and individual differences.
- It is essential to include variations in examples and references while teaching.
Q.1 Fill in the blanks by choosing correct option from following options.

1. .................. is father of educational sociology.
   (a) Brown  (b) George Payne  (c) Auguste Comte  (d) Octave

2. To increase the participation of citizens in taking decision for village development, ................ should be conducted regularly.
   (a) Ward meeting  (b) Health camps
   (c) Gram sabha  (d) Development ralleys.

3. .................. is not the objective of people participation in school work.
   (a) To solve school problems
   (b) To maintain relation between school and society
   (c) To increase credibility of school
   (d) To have cultural control on school.

4. To enroll the out-of-school children in the school is mainly responsibility of ..................
   (a) Samtadoot  (b) Bal rakshak  (c) School Management Committee  (d) CSR

5. As per ‘Corporate Social Responsibility’, the policy of social responsibility is implemented from .................. .

Activities

1. Prepare a report on any one NGO in your area.
2. Arrange meeting like Gramsabha in your class.
The goal of education is to develop ideal responsible citizen. To create a good citizen, appropriate education system is essential. To achieve this goal, the curriculum should be based on student’s interest and grasping power. Therefore necessary pedagogy and co-curricular activities etc. should be included so that the students can learn according to their ability. Educational Psychology helps in developing an appropriate curriculum according to students age, subject and its content. So it is important to study educational psychology.

4.1 Meaning of Psychology

The word Psyche (soul) + logos (study) are two Greek words which together mean Psychology, i.e. study of soul.

The great Greek philosopher Aristotle has written “De Anima” which means about the soul. That mean psychology was defined as the science of soul.

What is a soul? The answer to this question was unsatisfactory, so it was decided to change the definition. Hence the new definition of psychology as 'the study of mind' came into practice’.

Later in 1879 Wilhelm Wundt studied about emotions, feelings and internal experiences in the laboratory and further defined ‘psychology’ is science of consciousness. J. B. Watson, behavioural psychologist stated that, we can study the human behaviour objectively, and therefore behaviour is the subject matter of psychology.

Hence according to new definition psychology is the study of human behaviour.

According to the above definition, the study of animals was not included in study of Psychology.

William McDugall defined psychology as the “Science of Behaviour”.

There are many branches of psychology. From those diverse branches educational psychology is the important branch.

4.2 Definition of Educational Psychology

“Educational Psychology is psychology applied for improving teaching and learning process”.

- B.F. Skinner

“Educational Psychology describes and explains the learning experiences of an individual from the birth to old age”.

- Crow and Crow

“Educational Psychology is the science which applies already recognized psychological principles to solve educational problems.”

- E.R. Guthrie and F.F. Powers
“A systematic study of human behaviour and experience in the context of how to teach people is called as educational psychology.

- Mcfarland

We can say that from all the above definitions, educational psychology is applied branch of psychology, which includes individual's personality, developmental stage, teaching-learning methods, expectations of the development and problems reacted to it etc.

4.3 Objectives of Educational Psychology

- To understand how psychological principles and laws are used to solve teaching-learning, personality development, problems of adjustment.
- To utilise psychological principles, to solve the problems related to class management, discipline, social and ethical behaviour.
- To use motivation and punishment properly.
- To bring about students personality development skillfully through proper understanding of their individual differences.
- To use scientific methods, for educational and professional guidance to the students.
- To acquire psychological knowledge for teaching-learning, memory and forgetfulness and factors affecting on teaching and learning.
- Understanding the problems of normal and abnormal students and solving them skillfully.
- Psychological Analysis of behavioural issues to solve the problems of people and environment by suitable measures and the remedies.
- To Understand generalizations of mental science, rules, principles and theories in psychology.
- Teachers should take care of their own and students’ mental health. The teacher should introspect and improve the behaviour as the impression of his/her behaviour influences the students.

4.4 Nature of Educational Psychology

- Educational Psychology is a science of studying education process in depth. Educational psychology tries to solve educational problems of teachers and students. It helps in curriculum planning, teacher training, planning teaching learning methods, keeping in mind, student's interests, capacity, needs etc.
- Educational Psychology is a developmental science. New research, new information, formulas, methods, etc. are being included. Some ideas are changing and some ideas are getting included, due to which educational psychology is progressing.
- Internal capacity increases due to teacher training, which is the application of Educational Psychology.
- Educational Psychology means systematic study of educational development. It includes collection and application of information providing scientific base for teaching-learning process and strengthening educational process. In short Educational Psychology is the study of human growth and development, maturity and learning, psychological principles and application in the teaching-learning process.

4.5 Scope of Educational Psychology

1. Learner - In the educational process a person who is active participant individually or in the group is known as learner. Student is a major component of educational process. The main goal of education is all-round progress of the student. For this student's physical, mental, emotional, ethical, aesthetic, social
development should occur educational psychology takes the note of changes at every stage of development and provides guidance accordingly.

2. **Learning Process** - Along with understanding the students, it is also important to understand the learning process of the learner. A student learns in a classroom means, what does the student learn in the classroom? How does his learning process work? What are the teaching methods? Which factors affect learning? Such diverse thoughts are considered in educational psychology.

3. **Teaching Methods** - The basic purpose of teaching is to let students learn. Therefore the teacher needs to decide which method is useful for students. Accordingly, which is a good, impressive and result-oriented teaching method? How it should be done? What methods and techniques should be used for it? How to attract student's attention towards learning?, etc, all these issues are considered in educational psychology. The teaching has to be done after judging students interest, capacity, eligibility and inclination. Educational psychology also provides guidance regarding how to motivate students for studying. The study of educational psychology enables teachers to get familiar with Student's temperament, emotional, conflicts, mental health etc. The teacher can select proper method of teaching accordingly.

4. **Evaluation** - After providing the learning experiences to the students, the teacher has to evaluate them. This evaluation enables him to verify whether the expected change in behaviour and an all round development has taken place or not. The teacher has to use various techniques and tests for this. Educational psychology comes to his help in preparing administering and scoring of these tests.

In Short, educational psychology renders valuable guidance to teachers regarding educational objectives, effective teaching methods, use of appropriate teaching aids, attracting student's attention towards learning, motivating them for learning and doing many other educational tasks successfully.

Discuss the change that takes place in a person from birth to old age?

4.6 **Development Process**

<table>
<thead>
<tr>
<th>Characteristics of Development Process</th>
</tr>
</thead>
<tbody>
<tr>
<td>Continuity &lt; Sequential &lt; Collective Nature &lt; From macro to micro &lt; Complex &lt; Homogeneous &lt; Individual Differences</td>
</tr>
</tbody>
</table>

4.1 : Characteristics of Development Process
4.6.1 Characteristics of development process

Do you know?

Growth and Development are generally used as synonyms. There is a difference in linguistic perspective. If growth is limited, then development is broad concept. Growth is used as physical concept e.g. height, weight, length of hands and feet in the concept of growth is used quantitative changes.

Growth is the part of development process. Development implies one's behaviour and personality makeup. Development indicates qualitative change, but it can't be measured like growth. Development changes are qualitative e.g. brain development improves memory, decision making. All these are developmental changes. Development is based on heredity and it, goes from birth till death. Development, as said earlier implies improvement in functioning and behaviour hence qualitative changes which are difficult to be measured directly. They are assessed through keen observation in behavioural situation.

In this way, both the concepts of growth and development indicate the changes in individual's behaviour and personality.

4.6.2 Difference between Growth and Development

<table>
<thead>
<tr>
<th>Sr. No.</th>
<th>Points of Difference</th>
<th>Growth</th>
<th>Development</th>
</tr>
</thead>
<tbody>
<tr>
<td>1</td>
<td>Meaning</td>
<td>Measurable progress in body organs, structure is known as growth. Example-height, weight, hair, and number of bones etc.</td>
<td>Development involves the series of progressive, orderly and meaningful changes leading to the goals of maturity. eg. - Co-ordination in function of body parts, control on emotions, abstract thinking.</td>
</tr>
<tr>
<td>2</td>
<td>Nature</td>
<td>Growth is continuous and definite till particular age, but it is visible.</td>
<td>Continuous intellectual social, moral, emotional development is seen, through habits and behaviour of child.</td>
</tr>
<tr>
<td>3</td>
<td>Scope</td>
<td>Increase in number of body cells, increase in shape. Examples are growth of hands, legs, brain, muscles etc.</td>
<td>Development includes micro internal changes in all types of behaviour. So, development is broad concept.</td>
</tr>
<tr>
<td>4</td>
<td>Duration</td>
<td>Growth is up to limited period. Example - up to particular age height increases.</td>
<td>Development is continuous. No limit for age, duration. Due to experience Development occurs during whole life</td>
</tr>
<tr>
<td>5</td>
<td>Measurement</td>
<td>Growth is quantitative concept as it is measurable e.g. we can express growth in height and weight in numbers.</td>
<td>Development is qualitative. Due to development behavioural changes are observed in child. But how much changes occur can not be said definitely. We can predict the development by conducting different tests.</td>
</tr>
<tr>
<td>6</td>
<td>Factors affecting</td>
<td>Growth is affected by heredity and environment. Also Diet, Excercise, Health etc. affects growth</td>
<td>Development is also affected by heredity and environmental factors. Also proper education, inspiration, efforts affect development.</td>
</tr>
</tbody>
</table>

4.2 : Difference between Growth and Development
(1) Classify the following examples according to the characteristics of growth and development

- In standard tenth Ramesh’s weight was 35 kgs which became 42 kgs in standard twelth
- Gitanjali needed support to ride the cycle when she was 2 years old and she started cycling herself at the 6 years of age.
- Dipak was afraid to talk with the strangers but after going to school, he confidently performed on the stage.
- At six years of age Sarika’s height was 61 cm. At 16 years of age her height was 166 cm.

(2) At the time of child's birth height is 40-46 cm. and in adolescence it becomes 150 cm. From this what do you conclude?

(3) Tell the developmental stages which you know.

4.6.3 Stages of Development

To study development of child, developmental tasks related to each period of development are identified. These are called as Stages of Development. It is not necessary that every individual will attain these stages at same age, whereas it means that every individual’s rate of attaining a particular stage is different. Therefore to study the stages systematically and easily, the developmental stages have been divided in following age groups.

(A) Prenatal stage (conception to birth)

The duration from conception to birth is the prenatal stage of development. The development during this stage is mainly physical growth. Maximum growth and development of the foetus is completed till seventh month and therefore the child survives even if there is premature birth. Total duration of pregnancy is nine months within which maximum human development takes place.

<table>
<thead>
<tr>
<th>Prenatal Stage 250-300 Days</th>
<th>Postnatal Stages</th>

<td></td>
<td>Old Age</td>
<td>From 60 Years till death</td>
</tr>
</tbody>
</table>

4.4 : Stages of Development
(B) Postnatal Stages

1. Infancy and Early Childhood Stage
   (0 to 6 years)

This is first stage after prenatal development. Early childhood is a time of tremendous growth across all areas of development. The speed of adopting physical skills are very fast which reduces later. In this stage the child is dependent on the adult. The child is action oriented at this stage. Child learns through imitation. Child is curious and his mind is very fickle at this stage.

<table>
<thead>
<tr>

4.5: Characteristics of Infancy and Early Childhood Stages

Educational importance of Infancy and Early Childhood

• Education, given in nursery and kindergarten should be informal.
• Duration of educational programs should be minimal as the child has less attention span. The duration of periods in school should be less.
• Learning should be activity oriented. Children should be given ample opportunities like paper cutting, playing, singing, drawing and painting.
• Lot of opportunities should be provided for group songs, rhymes, action songs, etc.
• Good habits should be inculcated among the children. Cleanliness should be imbibed through story telling.
• Children should be given opportunity to co-operate with each other.

2. Later Childhood - 6 to 12 years

School admission is the most important step in this stage. Children of this age group go to school. They enjoy with their peer group. Children of this age group become aware of good and bad. Confidence increases at this stage.

| • Progress is slow.  
• In girls, physical development occurs slowly during 1 to 10 years and in boys during the age 10 to 11 years.  
• At this stage children are not conscious about their physical apperance.  
• Blood circulatory system, respiratory system and digestive system become active and grow continuously.  
• Eyes are fully developed. | • Performs different activities. Examples - To cut things with the help of scissor, knife, to write with pencils, to hold books.  
• As the muscles are developed, children perform skills related to hands, feet. Examples : dancing, playing instruments, doing embroidery etc.  
• Increasing confidence, as they can perform independently.  
• Incomplete development of higher mental activities. Examples - Logic, imagination.  
• Due to motor development child becomes physically and mentally healthy. | • Field experiences of children increases. They try to know new things.  
• Ask new questions related to things and incidences.  
• Attention span increases.  
• Perform activities voluntarily.  
• Vocabulary increases have use words skillfully.  
• Lot of respect for teachers. | • Enjoy social life  
• At this age children play with the friends of same age.  
• They are loyal to their group, they obey the rules and regulations of group.  
• Self appraisal, loyalty towards peer group.  
• They want to become centre of attraction among the peer group.  
• Use symbolic language in the peer group.  
• Development of social behaviour. Examples : Leadership, competition, co-operation etc. | • Afraid of imaginary things. Examples - darkness, ghost etc.  
• Adequate development of different emotions. Examples : love, anger, fear, worry etc.  
• Expression of emotions is intense and active.  
• At this stage, children become more emotional and sensitive.  
• Increase self respect and self confidence.  
• Live in group and love instinct develops more, hence child become more sensitive.  
• Express emotions through sports, writing and quarrel. |

4.6 : Characteristics of Later Childhood Stage

4.7 : Late Childhood Stage
Educational Importance of Later Childhood

- Team spirit develops in this stage. This attitude can be utilized for group activities, projects, art, and competition. Such responsibility should be given to the teenagers to excel in work.
- Provide a scope for teaching-learning. Reading, speaking, writing, performing experiments, counting, map filling etc. perform by a child.
- Children have respect for their teachers. They imitate the teacher, so the teacher should be aware of her/his behavior.
- Formal education is taken by the students in this stage. Therefore it is necessary to pay attention to their linguistic skills.
- Informative books should be made available for students.

At present you all are in adolescence stage. What are the changes you feel as compared to the late childhood stage? Check the answers with classmates.

3. **Adolescence stage - (12 to 21 years)**

Age between 12 to 14/16 years is called puberty. This is the most important period in human life. According to psychology this is a transformational period. A new tendency and new approach develops in this stage. Many physical changes are observed in this stage. There is a radical change in thoughts, feelings and behaviour becomes unstable. This period is considered to be of mental storms and emotional stress. There is constant comparison between reality and idealism.

Educational importance of Adolescence stage

- Some responsibilities need to be entrusted for boys and girls of this age group. However, teachers and parents should guide them.
- At this stage, adolescents have adapted to the culture, so their opinions should be taken into account. Avoid nagging constantly, rather give them some freedom.
- Teachers and parents should realize and understand the problems of adolescents. Talk to them freely for solving the problems.
- Environment of the school should be favourable to solve the problems of children.
- Do not disrespect the personality of children of this stage. Conducive environment should be created at home and school for effective skill development.
- This stage is very delicate and sensitive. Over pampering, over protection, liberalization, money laundering, addiction can affect the children negatively. Teachers and parents should show right way of life, so that they can become responsible citizens.

4.9: Characteristics of Adolescence Stage

★★★★
Q.1. Fill in the blanks by choosing correct answer from following options.

1. Concept of growth is utilised from ____________ measurement point of view.
   - (a) mental
   - (b) physical
   - (c) emotional
   - (d) social

2. ____________ is called as stage of storms and stress.
   - (a) adolescence
   - (b) childhood
   - (c) youth
   - (d) puberty

3. During ____________ stage boys and girls use symbolic language.
   - (a) toddlerhood
   - (b) childhood
   - (c) puberty
   - (d) adolescence

Q.2. Tick for correct answer, from the following options.

1. What is studied in Educational Psychology?
   - (a) Persons
   - (b) Society
   - (c) Educational institutions
   - (d) Animals

2. What are the objectives of Educational Psychology?
   - (a) To study the effect of environment on behaviour of students.
   - (b) To study the social condition of student behaviour.
   - (c) To study economic status of student.
   - (d) To study cultural factors of the society.

3. What is the application of Educational Psychology?
   - (a) To study economical status of teachers
   - (b) To understand individual differences
   - (c) To study physical status of school
   - (d) To study social status of parents

Q.3. Write answers in brief.

1. Write any three characteristics of developmental process
2. Write physical characteristics of childhood stage.
3. Write emotional characteristics of adolescence age.

Q.4. Write a short note.

1. Development process
2. Stage of emotional disturbances
4. Educational Psychology.
5. Application of Educational Psychology

Q.5. Answer in detail. (any one)

1. Write objectives of Educational Psychology in detail.
2. Write the scope of Educational Psychology in detail.

Q.6. Find out and write minimum 5 definitions of Educational Psychology from different reference books.
5.1 Concept of Management

5.1.1 What is Management
5.1.2 Basic Principles of Management

5.2 Educational Management

5.4.1 Zilla Parishad Education Officer (Primary)
5.4.2 Zilla Parishad Deputy Education Officer (Primary)
5.4.3 Block Education Officer
5.4.4 Education Extension Officer

5.1 Concept of Management

Management is a broad concept. Management determines objectives and prepares the plan accordingly. Though history of management is so old, discussion on scientific management started in 20th century. For the effective management planning is important.

If there is progress in schools, industries and other professions then we say that, there is good management. Parents also prefer those schools, colleges for admission of their wards whose management is good.

You must have attended different programmes in your school. If there is any drawback in organization of programme then we easily say that management of programme was not good. Fulfillment of objectives means management is good.

Educational Management and Administration

You have participated in different programmes in your school. In our daily life also we celebrate different programmes and functions.

- Which things are necessary for conducting any programme successfully?
- How is any programme planned?
- Which are the factors to be included in the planning of programme?

5.1.1 What is Management?

In management, many people come together and perform the work. To clarify the concept of management let us study some definitions given by experts.

- 'Management is a multipurpose means that manages a business, managers, work and workers.' - Peter Drucker
- 'Management is the development of people and it is personnel administration.' - Lawrence A. Appley
- 'Management is simply the process of decision making and control over the action of human beings for the purpose of attaining pre-determined goals.' - Stanley Vance
5.1.2 Basic Principles of Management

Henry Fayol put forth the 14 basic principles of management.

1. Division of work
2. Authority and responsibility
3. Discipline
4. Unity of authority
5. Unity of direction
6. Subordination of individual interests to the general interest
7. Remuneration
8. The degree of centralisation
9. Hierarchy of authority
10. Order
11. Equity
12. Stability of Tenure of Personnel
13. Initiative
14. Team spirit

5.1.2.1 Meaning and Nature of Educational Management

Meaning

Educational Management is important to fulfill the educational objectives and for planned implementation. Educational management is the careful use of physical and human resources, various activities etc. to achieve the educational objectives.

Nature

Objectives defined by the administration are fulfilled through the management. The functions of management are inter-related and complementary to each other. Management is an integrated process. This process includes system of authority. Students, time, teaching, labour, tools, direction, grant etc., each component is planned synthesized and controlled. It is used according to its efficiency to achieve educational objectives. In modern times, the need of management is felt in all fields. Principles of management are applied in the field of education also. Educational Management includes planning, organisation, direction, motivation, leadership, communication, decision, control etc.

5.2 Objectives of Educational Management

- To determine the policy of organisational functions of educational institutes.
- To develop appropriate inter-relationship among human components.
- To provide appropriate motivation to each component in the educational management.
- To complete the planned work in time and to run the institution in a good manner. To divide the work to be done.
- To plan the available physical resources.
- To accomplish the objectives set by the institution.

5.2.3 Need and Importance of Educational Management

Need

- To get information about structures of educational system.
- For the development of attributes like cooperation, group integrity, broad perspective etc.
- For facing challenges in the field of education.
- For conflict management between administration of the institution and other employees in the institution.
- For the aims of education and their fulfillment.
- For implementation of individual rights and responsibilities.

**Importance**
- After identifying educational objectives and policies; the planning of physical resources and programmes can be done.
- It provides economic and physical facilities to educational institutes and creates awareness of taking care of these facilities.
- It is useful in selection of human component, their appointment and development.
- It is useful in suggesting improvement in learning, teaching methods, curriculum, textbooks, subjects to be taught, timetable, co-curricular activities, evaluation etc.
- Each student can be motivated by providing appropriate opportunity of learning.
- It is useful in establishment and maintenance of good relations with society and other external systems.

### 5.2.4 Functions of Educational Management

1. **Planning**
   - Educational planning includes ways and means to achieve national objectives of education, educational policies, programmes and procedures.

2. **Organisation**
   - Organisation means assigning roles to human components involved in education process and then implementing through their inter-personal relations.

3. **Co-ordination**
   - To set the limits of authorities to set limits of work and correlate among them in terms of educational work eg. Principal and teacher.

4. **Direction**
   - Direction includes the explanation of task to the employee, to give orders and suggestions, to discuss, to observe etc.

5. **Communication**
   - Exchange of educational ideas, thoughts, facts, emotions between two or more individuals is called communication.

6. **Decision Making**
   - A process of selection of one alternative out of two or more alternatives, based on some specific criteria is called as process of decision making.

7. **Motivation**
   - Creating desire and enthusiasm for completion of any task is called as motivation.

8. **Control**
   - The concept of control includes measuring actual performance (task), evaluation of that performance (task) and suggestions required for corrective action so as to get planned outcome.

9. **An adjustment of resources and their integrative use**
   - It includes integrated attempts for adjustment of physical and human resources and human resource development.

10. **Implementation**
    - Implementation includes all essential activities required for completion of a task as per decided objectives.
Evaluation: It is a process of measuring and assessing the achievement of objectives. It provides an insight into strengths and weaknesses. It also helps to bring about improvement in educational management.

Do this

- Search and collect various definitions of 'Educational Management' using internet.
- Visit a school Headmaster office and get information of various aspects of 'Educational Management'.

5.3 Educational Administration

We often listen two words, 'Management' and 'Administration' in our day to day life. Management and Administration are two different concepts. The term 'Administration' is opted from Government system. Administration is meant to look after the functioning of any work-system. Administration is also a system designed to bring any work into action. This mechanism is for implementation of policies. Administrator implements the plans/schemes and gets it done by others.

To understand the concept of Administration let's study the following definition.

- Administration means to plan, to organise, to counsel, to co-ordinate and to control.
  - Fayol

- Administration means to look after the management and dealing with it.

- Administration means actual implementation as per planning.

Meaning of Educational Administration

Every nation in the world decides its national objectives of education by considering its social, economic and cultural considerations. The Government develops certain administrative system to fulfil the objectives set forth. Also, each country accepts a variety of administrative systems, depending upon its own needs, e.g. centralized administration, decentralized administration, administration of composite structure. Various policies and programs of the Government are divided through these administrative system. Planning is the core of administration. The work is carried out in the same way as the rules set out in the administration. Administration works after management and organization of any task.

Administration focuses on actual action. Educational administration includes policy making, co-ordination, outcomes, finance system, organization development and control.

5.3.1 Nature of Educational Administration

- The educational administration consists of planning, organizing, directing, co-ordinating and evaluating processes.
- Profit making is not the function of educational administration.
- All types of education has education administration.
- The educational administration is similar to general administration in some matters and in some matters it is different from general administration.
- Educational administration is done at various levels of education. It includes pre-primary education, primary education, secondary education, higher secondary education and higher education.
- Educational administration is done in all types of education. This includes formal education, informal education, adult education, general education, vocational education, special education, teacher education, integrated education, technical education etc.
- Educational administration is done at various stages. This includes central level administration, state level administration, district level administration, cluster level administration and organization level administration.

5.3.2 Objectives of Educational Administration

- Providing proper education to the students.
- Complete and fair use of all resources.
• Defining professional ethics and professional development of teachers.
• Implementing school activities useful for democracy.
• Mobilizing society.
• Implementing co-curricular activities and activities for quality enhancement.
• Completion of work in time.
• Enabling students to live life.
• Developing scientific attitude in students as well as developing objective approach within all areas of life.
• To improve quality of education.

5.3.3 Need and Importance of Educational Administration

Education is a continuous process. There are changes in the process of education over time in each era. Educational administration is necessary in order to bring about appropriate changes in educational system according to the need of the time. It is also necessary to identify the roles of teachers in accordance with social reform and social progress.

In ancient times, the school used to be conducted at Gurukul i.e. Guru's Home/Ashram. Therefore, Rishi-Muni (sages) had all the rights to decide the goals of education and its implementation. Since we have accepted democracy in the post-independence period, all rights of policy making of education and its implementation have come to the rulers.

In the democracy, there was a need for administration of various intellectual and ideological tasks, e.g. How to run private and Government institutions? What programmes should be implemented for educational development? For which kind of work, guidance is required? Educational administration is required for such tasks. In short, according to dynamic educational changes, educational administration is required to create citizens suitable for democracy and fulfilment of educational objectives.

5.4 Educational Administration at District and Taluka level in the State of Maharashtra

Maharashtra state was established on 1st May 1960. In Maharashtra State from 13th March, 1962 Zilha Parishad and Panchayat Samitee law was accepted. According to that from 1st May 1962 in Maharashtra the work of Panchayat Rajya Sanstha was started. According to this Law District is the main unit of Administration. Apart from Police and law the responsibility of remaining all departments were handed over to Zilla Parishad. The work of departments such as education, construction, health, co-operation, industry, agriculture, finance, social welfare were given to Zilla Parishad. Responsibility of education of cities were handed over to Corporation and Municipal Corporation. Due to this local Governing bodies such as Zilla Parishad, Panchayat Samitee, Grampanchayat and Corporation gained more importances in the field of education.

The responsibility of Primary and Secondary Education was handed over to Zilla Parishad. The control of Primary and Secondary Education is done by Primary and Secondary Education Officer. Structure of District Level Educational Administration is as shown on following page.

5.4.1 Education Officer (Primary)

For every Zilla Parishad, Education Officer is appointed to carry out the district educational responsibilities. The following responsibilities of district level educational management and administration is carried out by Educational Officer.
5.4: Functions of Zilla Parishad Education Officer (Primary)

1. Progress Report of Primary Education of District is submitted to Directorate of Education before 31st March.
2. Policy of Compulsory Primary Education should be granted and submitted to Directorate of Education.
3. Implementation of Compulsory Primary Education which is granted by the Government.
4. Implementation of Social Education Programme in district and submission of report to Government.
5. Transfers of Zilla Parishad Primary school teachers and monitoring on them.
6. Celebration of various National programmes and educational activities in the school.
7. Inspection of primary schools in the district and providing educational and administrative guidance to them.

Internet my friend

Collect the information of work (function) of Zilla Parishad Education Officer (Secondary) through the Internet.

5.4.2 Zilla Parishad Deputy Education Officer (Primary)

Deputy Education Officer is appointed to assist Zilla Parishad Education Officer.

Functions of Deputy Education Officer

1. Inspection of Primary and Secondary Schools.
2. Inspection of Private Primary Schools and sanction of grant to these schools.
3. Control over the work of Education Extension Officer and presenting the recommendations received from him to the Education Officer.
4. To recommend the Education Officer regarding the transfers of teaching and non teaching staff.

5.4.3 Block Education Officer

Block Education Officer is the incharge of Educational Administration of Taluka. He has to complete three responsibilities such as Educational Administration, Supervision and Control. The Block Education Officer is responsible for education related responsibilities of Taluka.
Functions of Block Education Officer

(1) To send all the administrative information of education to related persons.
(2) To distribute necessary resources to primary schools in Taluka.
(3) To inspect the Primary, Secondary and Ashram Schools in Taluka and submit the report to District Education Officer.
(4) To monitor the work of Education Extension Officer.
(5) To celebrate the various national programme in the schools.
(6) To visit the schools without giving prior intimation and observe the school work.
(7) To control the working of the private primary schools and supervision of these schools.
(8) To take efforts to enhance the quality of education.

5.4.4 Education Extension Officer

Education Extension Officer is the important and lowest component of educational system. The role of Education Extension Officer is important in universalization and quality development of primary education.

According to educational administration every taluka is divided into parts. It is called as bit. One Education Extension Officer is appointed for every bit.

Functions of Education Extension Officer

(1) To do inspection of Primary Schools in allotted area (Bit)
(2) To supervise the work of primary teachers, write confidential reports, give necessary recommendations to the Block Education Officer.
(3) To arrange groups conference for primary school teachers and guide them.
(4) To do inspection of private primary schools and give recommendations for grant to Deputy Eduaction Officer.
(5) To monitor various Government policies and control its implementation. eg. distribution of uniform, book bank, Savitribai Phule Dattak Palak Yojana, etc.
(6) To collect information of Kindergardens. (Balwadi)
(7) To monitor every year the weekly programs of primary schools, meant to strengthen the compulsory primary education.
(8) To help senior officers in inspections of secondary schools in their area.

Arrange an interview of Education Extension Officer with the help of your teacher. And try to know the structure of Bit level educational administration.
Q.1 Fill in the blanks.

(1) The chief guest of the Annual programme (Gathering) appreciated the programme. so the ................. of the programme is good.
   (a) Planning       (b) Annual Programme
   (c) President      (d) School environment.

(2) In which of the alternatives given below Educational Management is not required.
   (a) For the implementation of Educational Aims
   (b) To avoid the conflict among manager, administrator and employee.
   (c) For upbring of students
   (d) To face the challenges infront of field of Education.

(3) ................. focuses on direct activities.
   (a) Management     (b) Administration
   (c) Planning        (d) Organisation

Q. 2 Write the answers.

(1) Objectives of Educational Management
   (1) ..............................
   (2) ..............................
   (3) ..............................

(2) Objectives of Educational Administration
   (1) ..............................
   (2) ..............................

Q. 3 Write the answer in brief of the following.

(1) Write any four functions of educational manager.

(2) Write the functions of Education Officer of Zilla Parishad (Primary).

(3) According to you what are the characteristics required for Administrator ?

Q. 4 Complete the Activity.

(1) Functions of Educational Management
   1. ........................................
   2. ........................................
   3. ........................................
   4. ........................................
   5. ........................................
   6. ........................................
(2) Necessary components of Educational Management

Q. 5 Write the Answers of the following questions.
(1) Write the Need of Educational management.
(2) Write the Nature of Educational Administration.

Q. 6 Write/Express your opinion.
(1) For the success of co-curricular Activities (Birth Anniversary/Death Anniversary/Sports Competitions/National Days) What type of function will manager do?
(2) As a best manager what type of 'Work Motivation' should be given to the assistants?
(3) For a good organization which precautions should be taken in the inter-relationship of human resources?

Q. 7 Prepare the Report.
(1) Visit the school committee chairman of your school. Collect information regarding the work of school committee and prepare the report.
(2) Organize any one co-curricular activity/programme in your school and make report on the problems you have faced while organizing the program.
(3) Discuss with your Headmaster and try to understand the functions of Headmaster and write the report on it.
(4) Meet Block Education Officer of your taluka and try to understand the structure of educational administration. Write a report on it.

6.3 : Changes in Teaching

6.2 Changing nature of teaching

Do you know?

There have been changes in the nature of teaching as per changes in the needs, situation and time. These changes which have occurred from the ancient times till today’s modern era can be understood from the information given below.

6.2.1 Ancient teaching methods

(1) Teaching methods during the Vedic Period

The Vedic education system is the first education system which emerged in the ancient India. This education system was based on the Vedic philosophy and thoughts and hence is called as the ‘Vedic Education System’. According to this system there are two types of knowledge (Vidya), namely ‘Paravidya’ and ‘Aparavidya’. ‘Paravidya’ refers to the most superior ‘spiritual knowledge’ or the ‘knowledge of self realization’. ‘Aparavidya’ means the knowledge which is useful in living the materialistic world. Both of these were essential for leading a worthy human life.

Education used to be imparted in the ‘Ashrams’ which were called as ‘Gurukul’.

6.4 : Teaching-Learning Methods during the Vedic Period

(2) Teaching Methods during the Buddhist Period

According to Buddhism the ultimate aim of life is ‘Nirvan’ or ‘Salvation’. The teaching methods focus on making an individual capable to achieve the state of ‘Nirvana’ or ‘Bliss’. Their teaching methods include oral method/recitation, discussion and dialogue, debate, thinking, contemplating, meditation, lectures of the experts and scholars etc. The knowledge is acquired in the ‘Vihars’.
(3) Teaching Methods during Jainism Period

In Jainism following teaching methods were used.

1. Preaching :-
   - Discourse
   - Dedicated practice of listening with concentration

2. Reading religious scriptures :-
   - Reading with concentration
   - Reading of the correct and incorrect examples. (This technique is called as ‘Aamanay’).

3. Contemplation :-
   - Contemplation and thinking of read stories is termed as ‘Anutpreksha’).

4. Clarification of doubts :-
   - Clarifying the doubts arising after contemplation from the Acharya (Teacher) (This is called as ‘Prachhanna’).

(4) Teaching Methods during Islamic Period

In Islam the primary education is given in the ‘Maktabs’ and the secondary education in the ‘Madarsas’. Here recitation and storytelling methods are used. In higher education speeches, discussion, reading of the reference books, and self-study are the methods used for acquiring knowledge.

Complete the Table

Which methods from the ancient period are used even today? Discuss their advantages and limitations.

6.6 : Ancient Teaching Methods

6.2.2 Teaching Methods in the Modern Period

In the later half of the 18th century the British, French and other people from the Western countries started coming to India. Radical changes occurred in education during this period. English language was introduced in education by Lord Macaulay in India. During that time mathematics and languages were given utmost importance. So recitation, reading, grammar translation etc. methods of teaching were used.

(4) Teaching Methods during Islamic Period

In Islam the primary education is given in the ‘Maktabs’ and the secondary education in the ‘Madarsas’. Here recitation and storytelling methods are used. In higher education speeches, discussion, reading of the reference books, and self-study are the methods used for acquiring knowledge.

6.3 Rationale for selection of teaching methods

- Previous knowledge of the students:
  The previous knowledge of the students has to be first assessed so that any new subject content can be effectively conveyed to the students. For this purpose the teacher can ask questions, narrate story, use various teaching aids/(pictures, charts, maps) so that the students are able to recall their previous knowledge.

- Maturity of Students:
  While selecting the teaching method the teacher has to consider the age, physical and mental maturity, like-dislikes/interests and ability of the students.
Sources of Knowledge

**Ancient Period**
- Guru
- Scriptures
- Gurukul and Ashram
- University

**Modern Period**
- Teacher
- E-learning softwares and devices
- Internet
- Social Media
- Newspapers

6.7 : Sources of Knowledge

6.8 : Changing Nature of Teaching

- **Surroundings of the students**: The teaching method should be selected considering the geographical conditions of the student, whether he/she comes from rural or urban area.

- **Available Teaching Aids**: The teaching aids have an important role to play for teaching any subject, making the subject content easy to understand, giving variety of educational experiences. eg. charts, maps, pictures, models etc. Hence it is important that the teacher considers the available teaching aids and then selects the teaching method.

- **Expected time**: It is important to consider the allotted time period for teaching, while selecting the teaching method.

- **Scope of the content**: It is essential to take into consideration the scope of the content and also the content which has to be actually taught in the classroom while selecting the teaching method.

- **Objectives of teaching**: The teacher should think which method of teaching would be most suitable to achieve the objectives of the unit and accordingly select the method.

- **Participation of students**: The teacher should select a method which helps in obtaining the maximum participation of the students. From various teaching methods teacher should select appropriate teaching method.

6.4 Principles of Teaching

Teaching is an art as well as a science. Hence it becomes essential to consider the guiding principles of teaching. Following are the principles of teaching.
A principle is that which remains at the focus of any event, situation or behaviour.

- **Principle of Motivation**: Motivation is the inspiration to do any work. It is of two types— intrinsic and extrinsic. Teacher should himself/herself emphasize on intrinsic motivation and motivate the students. A teacher should identify the various needs of the students and accordingly find out ways to motivate them. Since achievement is the most effective kind of motivation, the teacher should guide the students accordingly.

- **Principle of Learning by Doing**: For achieving positive behavioural change in the students, it is important to give them appropriate learning experiences. Actual experiences and experience gained by actual performing the task is most effective in the learning of the student. Hence the students should be educated using the principle of learning by doing.

- **Principle of Life Oriented Education**: The teacher should try to link the subject content to be taught to the student with actual life. The students should be able to use whatever they have learnt in actual life situations. For this it is important to give them education related to the aspects as shown in the following figure.

- **Principle of appropriate method of teaching**: If a teacher wants to make the teaching effective they should make use of both traditional as well as modern methods of teaching considering the subject content to be taught and also the age of the students. Good teaching is assisting the students for learning. Teaching method should be interactive and give scope for students to be active.

- **Principle of deep knowledge**: A teacher can explain his subject properly and solve the doubts of his students only if he has deep knowledge of his subject. A teacher should always try to remain a learner and keep himself updated with the latest knowledge about his subject.

- **Principle of use of teaching aids**: Today teaching aids have got a lot of relevance in making the teaching-learning process effective. They are very important in giving direct as well as indirect experiences to the students.

### Teaching aids

</tr>
</tbody>
</table>

6.10 : Educational Devices

- **Principle of appropriate evaluation**: The main objective of teaching is to have desirable behavioural change in the student. For this it is essential to have continuous comprehensive evaluation of students.

### Tools of Evaluation

- Quantitative
  - Examination
  - Written
  - Oral
- Qualitative
  - Checklist
  - Rating Scale
  - Questionnaire
  - Interview
  - Online

6.11 : Tools of Evaluation
6.5 Maxims of Teaching:

Let’s Tell

Why do we use maxims? Maxims are used to make the learning of the students effective. The maxims of teaching are very useful in guiding the teachers for their teaching. These maxims are based on the principles of psychology of learning.

(1) From Known to Unknown

Let’s Tell

(i) Why is ‘addition’ taken as a reference while teaching ‘multiplication’?

(ii) Why are various stories, examples, references, given to explain the principle - ‘It is easy to break, but difficult to join’?

Any new concept should be taught to the student by linking it or relating it with previous knowledge i.e. what has been learnt earlier by the students. This helps in better understanding by the students. The maxim ‘from known to unknown’ is one of the basic and most important maxims of teaching. Use of this principle reduces a lot of stress in the students while learning new concepts.

(2) From Easy to Difficult

Let’s Tell

Tell the following concepts from easy to difficult. e.g. addition, multiplication of monomial, addition multiplication of binomial, word problems based on addition and multiplication.

It is necessary to teach easy and simple content first and then proceed to teach the content which is difficult and complicated to understand, or the students may find difficult to comprehend. Using the maxim ‘easy to difficult’ helps to develop in the students a feeling that they are able to understand the new content easily.

(3) From Concrete to Abstract

The things which we are able to experience through our sense organs are concrete things. eg. book, table, building, etc. Those aspects which we are able to experience at the mental or emotional level are abstract. eg. Affection, patriotism, hatred, greed etc.

- Prepare a list of concrete and abstract things.

Let’s Tell

Which concrete examples can we give to the students while explaining the concept of ‘heat’ in Science?

Concrete concepts are easier to understand than the abstract ones. They can be understood quickly. Abstract concepts are difficult to visualize. Hence while teaching we should explain the concrete concepts. First and then explain the abstract ones. This facilitates the understanding and learning of the students.

(4) From Particular to General

<table>
<thead>
<tr>
<th>What do you understand from following examples?</th>
</tr>
</thead>
<tbody>
<tr>
<td>(1) $4 + 0 = 4$</td>
</tr>
<tr>
<td>(3) $-10 + 0 = -10$</td>
</tr>
<tr>
<td>(2) $16 - 0 = 16$</td>
</tr>
<tr>
<td>(4) $-25 - 0 = -25$</td>
</tr>
</tbody>
</table>

For many similar kind of examples we are able to formulate a rule. There is one particular principle which is related with different 'situation'. Hence while teaching certain topics it is essential to give specific examples and then based on it explain the rule or the principle.

This maxim of going from particular to general is called as inductive method.
(5) From General to Particular

Let's Tell

What examples would you use to explain the Proverb "United we stand, divided we fall?"

Sometimes the rule, or the definition is explained first and then various examples related to it are given. This is general to particular. This maxim is exactly opposite of the maxim particular to general. When we use this maxim in our teaching, we are said to be using the ‘Deductive Method’.

(6) From Whole to Part

Let's Tell

What will you do while learning a poem, which you like?

While teaching a subject first present a comprehensive picture in front of the students and then go into the details, i.e. make use of the maxim from ‘whole to part’. This maxim is based on cognitive psychology. e.g. While teaching the different parts of a flower, we first show the entire flower and then its parts.

(7) From Part to Whole

Complete the story using the following outline.

Dense forest - Robbers - rob the people - kill them - meet a monk - asked to pluck leaves of a tree - asked to again join the leaves to the tree-thieves unable to do so - monk’s preaching.

Moral :- What do you learn from the story?

When logic of the students is developed and they have matured enough we should use the maxim from part to whole. This is exactly opposite of the maxim from whole to part. eg. You explain the different parts of the flower first and then the functions of the flower.

(8) From Empirical to Logical

The two ways of acquiring knowledge are - experience and logic. In the early years it is important for a child to acquire knowledge through experiences, i.e. Experiential learning. eg. Visit to a fort. Once the logical thinking has been developed and some basic knowledge has been acquired, it becomes appropriate to use the method focussing on the use of logical thought. e.g. Study of the fort after considering its architectural structure. The design of the fort, colour combination, the material used, water management etc. on the basis of which the students can logically derive about the then existing administration, life style, political life etc.

(9) From Psychological to Logical

Psychology always focuses on the emotional aspect, while logic focuses and is related with the intellectual or cognitive aspect. Hence while teaching poetry or while portraying the character it is important to explain the emotional aspect first, and then explain the central idea.

The teacher should use these principles as per the need of the content.

6.6 Different Teaching Methods

Recall

Which different methods have been used by your teachers for teaching you? Explain with reasons which among those have you liked.

6.6.1 Narration Method

For making the teaching effective a teacher has to assimilate a number of skills out of which one is skill of narration. Narration is the next step of the story telling method.

“Narration means a description of an event or a situation”.

This method is used to explain new information, describe an event, incident or a scene. Narration can win the hearts of the students if it is done with ease, in appropriate speed, in a delightful manner and using appropriate gestures. It is necessary for the teacher to plan where and when to use this method on the basis of the content to be taught.
Observe the Table

### Narration Method

<table>
<thead>
<tr>
<th>Merits</th>
<th>Limitations</th>
</tr>
</thead>
<tbody>
<tr>
<td>• Useful method for new knowledge.</td>
<td>• Teacher centric method.</td>
</tr>
<tr>
<td>• Lot of knowledge can be imparted in less time.</td>
<td>• Lack of students participation.</td>
</tr>
<tr>
<td>• To develop interest in the subject.</td>
<td>• Psychologically inappropriate method.</td>
</tr>
</tbody>
</table>

#### 6.12: Merits and Limitations of Narration Method

Watch and listen various stories on the You tube to understand the Narration Method.

#### 6.6.2 Lecture Method:

Recall and Discuss

Which lectures among those you have heard until now, have you liked? Why?

Let's Think

According to you what do you mean by a ‘Lecture’?

According to James Michael: “The lecture is a pedagogical method where by the teacher formally delivers a carefully planned expository address on some particular topic or problem”.

“The verbal flow of information imparted by the teacher to the student is called as a lecture”.

What kind of lecture would you like to listen to?

Everyone would like to listen to a lecture which has a good flow. A teacher delivers knowledge, principles, truths, new ideas and other information to the students through his lecture. Since it is the lecturer who talks continuously for a very long time in this method. It is a method which emphasises on one-way communication. Students have to take notes while listening ‘Lecture’.

#### Merits of Lecture Method

- Students are motivated to learn due to effective narration.
- Students develop the habit of taking notes while listening.
- Develops oratory of the teacher.
- Useful method to explain new information, principles, concepts.
- Useful for describing events, explaining and justifying the principles.
- Useful to deliver abundant content to a big classroom within a very short time.

Steps in Lecture

(1) Introduction
- Develop curiosity
- Motivate to learn the new subject.
- Ask questions on previously taught content.
- Ask questions on experiences, related to the content.

(II) Presentation of the content
- Tell the information, concepts, principles.
- Give examples of day to day life.
- Make use of teaching aids.
- Sequential presentation of content to facilitate understanding.

(III) Compilation
- Summarize
- Ask questions for compilation or consolidation.
- Understand the co-relations between sub-topics.

6.13: Steps of Lecture Method
Complete the following circles

Limitations of Lecture Method

Not suitable for developing skills and conceptual understanding
Less scope for self learning and logical thinking
Students become passive listeners

Limitations of Lecture Method

Not suitable for developing skills and conceptual understanding
Less scope for self learning and logical thinking
Students become passive listeners

6.14 : Limitations of Lecture Method

Internet My Friend

Observe and listen to a lecture of an expert on a topic of your choice. Write a note on the style of presentation.

6.6.3 Source Method

How did you collect information about historical events/place?

This method is primarily used for teaching history. It is useful to make the teaching of history more objective. The truth of historical events can be traced using source method.

The study and use of original material and original sources, while teaching history is called as ‘Source Method’.

“Critically examine and analyse the available sources or available proofs through research for finding out the truth behind the events and reaching towards a conclusion is called as Source Method”.

Complete the Table

Classify the various historical sources you have studied using the following table :-

<table>
<thead>
<tr>
<th>Oral sources</th>
<th>Written sources</th>
<th>Things/Buildings sources</th>
</tr>
</thead>
<tbody>
<tr>
<td>Folksongs</td>
<td>Copper plate</td>
<td>Taj Mahal</td>
</tr>
<tr>
<td>..............</td>
<td>.................</td>
<td>..........................</td>
</tr>
<tr>
<td>..............</td>
<td>.................</td>
<td>..........................</td>
</tr>
<tr>
<td>..............</td>
<td>.................</td>
<td>..........................</td>
</tr>
</tbody>
</table>

6.15 : Historical Tools

Merits of Source Method

• Sources help to make history of events, peoples and places more concrete and meaningful.
• It helps to get information about historical research and reliable evidence.
• The sources are useful to make history real and alive.
• It stimulates curiosity about the historical events.
• It helps to develop critical thinking and reasoning in the students.

Limitations of Source Method

• Since the sources may be available in different languages like Persian, Arabic, Sanskrit, Pali etc. the teacher and students may not be well-versed with them.
• It is a time consuming and expensive method.
• It is not useful for small children.
• If the information in the available sources is one sided, then it may distort the historical facts.

Find out

Collect information regarding Indian and Foreign institutions that undertake historical research.

6.6.4 Journey Method

This method is used in the teaching of Geography, History and Languages.

In the journey method students are taken on an imaginary journey and given an indirect experience. It is important that the teacher asks relevant questions in the course of this imaginary journey. The journey method involves following three steps :-
(1) Introduction
The objective behind the journey is clarified. In this step the students are informed in advance that the journey is going to be imaginary.

(2) Actual Teaching using Journey Method
The content is taught using maps, pictures, models, filmstrips etc. using narration. Some important points can be written on the blackboard.

(3) Evaluation
In this step questions are asked on the content that is taught and the students evaluation is done.

Merits of Journey Method
- Places which cannot be visited due to geographical conditions can be taught using this method. e.g. Volcanic mountains.
- It helps to save time, energy and money since students are taken on an imaginary journey.
- It helps to avoid dangers that may occur during an actual journey e.g. accidents, natural disasters, etc.

Limitations of Journey Method
- Learning through an indirect experience is less effective than when an actual and direct experience is given.
- The method requires use of various learning resources to create an actual experience before the students. This may be difficult, time consuming and expensive work.
- It takes more time to teach the content than when taught using the regular method.

Use Your Brain
Which different subject content can be taught using Journey Method?

6.6.5 Discussion Method
This method is useful for grown-up and mature students. These students have sufficient previous knowledge about the topic to be discussed, can think independently, can confidently and independently present and justify their thoughts and ideas and can also clarify doubts wherever required. Hence this method is very useful for adolescents.

Group Discussion, Panel Discussion, Dialogue :-
The teacher divides the students into groups and assigns them different subtopics, by dividing the content. The groups then prepare the topic using textbooks, reference books, maps, time line, internet sources, etc. Students discuss in their respective groups and the teacher moves around supervising and guiding them. After the students have learnt the content in the group, they present it before the entire class. Other students asks them questions and the group leader of the group who is presenting answers them. The teacher explains wherever he/she feels it is essential. In this manner all the groups come forward and the entire content is completed.

Discussion method is useful for teaching subjects like history, geography and language. In this method the role of the teacher is of a facilitator, and hence needs to have mastery over the content. Students are engaged in self-learning in this method. Hence they learn to think independently, become self reliant and confident. The lesson becomes more lively since all the students are active and involved. The spirit of cooperation is developed since lot of interaction takes place between the students.

Complete the Table

<table>
<thead>
<tr>
<th>Merits</th>
<th>Limitations</th>
</tr>
</thead>
<tbody>
<tr>
<td>Can discuss based on the previous knowledge..</td>
<td>It is not useful for handicapped and small students.</td>
</tr>
<tr>

<td>Time consuming method.</td>
</tr>
<tr>
<td></td>
<td></td>
</tr>
</tbody>
</table>

6.16 : Merits and Limitations of Discussion Method
6.6.6 Demonstration Method

In this method the teacher demonstrates an experiment, actual objects, process etc. and explains it. In this method the teacher along with the students observes the experiment and keeps a record of the observations.

- From concrete to abstract or direct to indirect.
- Knowledge through observation.
- Only that which can be seen or experienced is the truth and is reliable.

This method is useful where students are not able to imagine about a concept or when explanation of a concept is difficult. Teacher actually performs the actions and explains. Students observe the teacher. They also assist the teachers during demonstration, take measurements, keep notings and also try to derive inferences and conclusions. Demonstration method is mainly useful for teaching Science subject.

Observe the following picture and answer the questions.

6.17 : Teacher demonstrating an experiment in the laboratory

Q. : Observe the above given picture and explain the nature of demonstration method in your own words.

Merits of Demonstration Method
- Concepts can be clarified using this method, than merely explaining the concept.
- Students realize all the safety measures and precautions to be taken when conducting experiments which may be dangerous. e.g. preparation of chlorine gas, hydrogen gas etc. and testing their properties.
- It helps to develop interest in science and also the scientific attitude among students.
- As compared to individual practicals, more number of experiments can be demonstrated within a short period.
- Students get opportunity to learn the ideal methodologies from experienced and expert individuals.

Limitations of Demonstration Method
- It doesn’t use the principle of learning by doing.
- Students don’t get the satisfaction and enjoyment of performing experiments individually.
- It is difficult to observe if there are large number of students in the classroom.
- Students may not get introduced to all the materials and equipments used for demonstration.
- Lack of pre-planning may result in an unsuccessful demonstration.

6.6.7 Project Method

This is one of the important methods used in teaching. The American philosopher John Dewey is the proponent of this method. But his disciple W.H. Kilpatrick is regarded as the pioneer of this method. According to him when an individual does an activity himself, he remembers the content better.

According to W.H. Kilpatrick, ‘A project is a whole hearted purposeful activity proceeding in a social environment’.

Dr. J.A. Stevenson defines project as - ‘A project is a problematic act carried to completion in its natural setting’.

From the above definitions it is clear that in a project importance is on the activities of the students. The students undertake a task or a problem either individually or in a group. They themselves take efforts to solve the problem. To complete the project the students have to perform various tasks like gathering information, performing experiments, field
visits, reading, interacting with experts, etc. In all these acts the teacher plays the role of a guide or a mentor and wherever required even as a resource person. They also assess and evaluate the project work. This method is useful for teaching of all subjects in the school.

**Steps of Project Method**
(1) Selecting the topic for the project.
(2) Planning of project.
(3) Actual implementation of the project.
(4) Evaluation.

**Merits of Project Method**
- Active participation of individual student
- Development of habit of self-learning
- Development of creative spirit
- Development of cooperative spirit

**Limitations of Project Method**
- Time consuming
- May not develop mastery over content
- Lack of expert teachers
- All students may not participate equally

**Some Project Topics**
- Preparing models - eg. Historical forts, types of houses, etc.
- Collections - eg. Coins, objects, pictures, types of stones etc.
- Poster making - Save environment, save the girl child, etc.

6.7 Characteristics of Good Teaching Method

- Develops interest in learning the subject
- Develops clarity in thoughts
- Participation in the teaching learning process
- Application of the knowledge in day to day life.
- Development of cooperation through team work

6.18: Merits and Limitations of Project Method

6.19: Characteristics of Good Teaching Method

Features of teaching-learning process in Vedic Period

Reciting

Q.4 Answer in brief

(1) Write any two definitions of teaching.
(2) According to you what are the criteria of a good teaching method?
(3) Explain in brief ‘Narration Method’.
(4) Write the limitations of ‘Source Method’.
(5) Write the objectives of ‘Demonstration Method’.
(6) Enlist the maxims of teachings.
Q.5 Write notes on
(1) The Islamic method of teaching.
(2) Maxim - From concrete to abstract.
(3) Source method.
(4) Steps of lecture method.
(5) Discussion method.

Q.6 Differentiate
(1) Vedic Education System and Buddhist Education System.
(2) From General to Particular and Particular to General Approach.
(3) Journey Method and Project Method.

Q.7 Answer in detail
(1) Explain the changing nature of teaching.
(2) Explain the teaching methods in Jain Education System.
(3) Explain Project Method with an example.
(4) Write the maxims of teaching along with examples.
(5) Explain the principles of teaching.
(6) Explain the lecture method along with its merits and limitations.

Activity/Project
(1) Visit a historical place and write a report on it.
(2) Arrange a competition on 'Narration' in your classroom.

***
Introduction

A student needs to practice and take efforts innovatively to gain information and knowledge and for these efforts the student gets guidance from teachers, parents and also from friends. On the basis of acquired guidance and experiences students search information and knowledge. Science helps in solving problems in day to day life. By taking this support to solve educational problems, Scientific Method is used. On the basis of science, study of educational problem are taken into consideration and here educational research comes in the discussion as a subject.

7.1 Concept of Educational Research

Change as per time is indivisible part of human life. The root cause of this changes is research. To solve the problem, to make a change in present situation, invention of new knowledge are the main functions of research.

Let’s Recall

- What is Invention?
- Which inventions do you know?
- What are the problems faced in day to day life?

7.2 Meaning of Educational Research

In research to find out the new facts and for checking the previous facts, critical and systematic study is done. Detail discussion is done on findings of such study. The detail inquiry and experiment of the findings from the study is called research. This means that the things which are already in existence but not known are brought infront of all; this is called Research.
Do you know?

The word “Research” in English is derived from French word “Cerchire” which means “search” and search means to discover again & again.

Remember it

- To solve the problem with the help of scientific method is called ‘Research’.
- Research means critical analysis, testing and continuous and systematic study for searching facts and principles.
- Research means well pre-planned efforts taken for solving research problem

Complete the Chart

7.2 Meaning of Educational Research

Students will be enriched with knowledge when they are fulfilled with accurate concept, subject, innovative programme and information in the field of education. For enrichment of knowledge, teaching learning is the main process. The main components of this process are students and teachers. So it is necessary to undertake research. Due to this educational problems may be solved and quality of education process will be increased. Educational research means the research which solves the various problems in the process of education and increased the quality of education.

7.3 : Problems while pursuing Education
Educational Research is an arrangement of different activities to search for characteristics and co-relations required for making educational process more effective.

Educational research is that activity which is directed towards the development of science of behaviour in educational situations.

**Areas of Educational research**

Following areas are taken into consideration while doing Educational Research:

- Educational Philosophy
- Educational Psychology
- School Administration
- History of Education
- Education for Marginalised/Deprived group.

**7.3 Need of Educational Research**

Educational Research is conducted to increase reliability in teaching-learning process and evaluation. The Education Research is for following reasons.

- For Critical Study
  - To solve the problems of students
  - To solve problems in Teaching-learning
  - For Effective Educational administration
  - To enhance the quality of Education
  - For framing the nature of curriculum

**7.4 : Need of Educational Research**
Do you know?

- Research is done for solving problems in teaching learning process.
- Educational research is a cause of progress in the field of education.
- It is necessary for educational changes.
- Educational Research is necessary for quality improvement of education.

Think and Discuss

- Can students understand better, if teacher uses technology in teaching?
- How recurrent educational problem can be solved by taking efforts again and again?
- How can we make optimum use of time by doing time management?

7.4 Characteristics of Educational Research

- To Solve Educational problem
  The main objective of educational research is to solve problems faced by main components in education process, i.e. teachers and students. Educational research is useful to mobilize the education process.

- Scientific Approach
  While doing educational research scientific method is used. Using scientific methods, educational research is conducted in a systematic manner.

- Based on previous knowledge
  While doing educational research available information and knowledge is used. The application of previous knowledge is done while doing process of research.

- Educational Research is purposeful
  Educational Research is done by keeping objective in mind. To achieve this purpose scientific method is used.

- Objective and Accurate
  The researcher tries to solve the problem objectively. The information received/found in the research is objective and accurate. If the treatment and activities implemented by the researcher are objective then only acquired results will be accurate. Subjectivity like prejudice and personal benefits do not come in research.

  Apart from this, rational explanations and prediction are also the characteristics of educational research.

7.5 Basic concepts in Educational Research

(1) Research Problem
  The research problem is the problem faced by teachers or stakeholders. It can also be an issue related to new concepts or any challenge in theoretical and practical aspect.

(2) Research Title
  The title of the research is the expression of research problem in clear, meaningful and precise words.

(3) Variables in Research
  'Variables' are anything that can affect or change the results of a research study.

  This term is used in educational research after the study of situation to measure individual property of things, quality and characteristics. Measurable things in a research title are the 'variables' i.e. the things in research which can be measured are called variables in research. eg. Health related habits, scores in examination, computer assisted programs,
(4) **Objective of Research**

The arrangement of sub questions in the form of statements related to selected problem for research are called objective. Eg. To know the health habits of XI std. students.

(5) **Research Assumptions**

It is unexamined statement in research which depends on previous experience and previous knowledge. eg. Students are not aware enough regarding proper habits about health and hygiene.

(6) **Research Hypothesis**

Hypothesis is probable answer of research problem. eg. If we guide XI std. students about health-related habits, there will be improvement in their health-related habits.

(7) **Research Population**

The research population is the total number of respondents out of which the researcher has selected the respondents for the research. The result obtained from the sample of the research are applicable to the total population of research. eg. 'All Students of XI std.'

(8) **Research Sample**

Sample is selected group for research which includes all characteristics of population. e.g. The group of students selected for research from XI std.

You want to examine/check reading capacity of students of Std. I to Std. VII of one school in your area. For that how will you determine population and sample?

(9) **Tools of data collection**

Tools of data collection are the means through which data collection is done from the respondents for the research study. eg. Questionnaire, psychological tests, achievement tests, rating scale etc.

(10) **Data Analysis**

Data analysis is analysing the data according to the objectives of research and coming to final conclusions.

- Which are good health habits?
- What are the tools of collecting information for research?
- Which problems arise while getting education?

7.6 **Types of Educational Research**

We have already discussed about meaning, definition and basic concepts in educational research. Now we will understand about types of Educational Research. Actually these types of research are applicable to research in general; hence here they are also applicable to field of education.

- Fundamental Research
- Applied Research
- Action Research

7.6 : Types of Educational Research
Till now you have studied about various scientists and their inventions. Now prepare a list of various scientists and their inventions.

### 7.6.1 Fundamental Research

Fundamental research deals with creating laws, theories or basic knowledge of the concerned subject. It goes deeper into the problems and gives the integrative solution of it.

Fundamental research concerns with acquiring the knowledge about natural and social phenomena. It interprets them and establishes hypotheses and assumptions about them.

Acquisition or creation of knowledge is main objective of Fundamental research.

E.L. Thorndike’s Laws of Learning
1. Law of Readiness
2. Law of Exercise
3. Law of Effect

### 7.6.2 Applied Research

Use in day to day life is the main objective applied research. Emphasis is not given on acquisition of knowledge but to solve the problem.

The research done for problems arising by using various finding, laws, principles, theories acquired by fundamental research is called applied research.

eg. To encourage pre-primary level students to learn interaction with peers on the basis of theory of Jean Piaget.

### 7.6.3 Action Research

Action Research is one of the types of applied research.

Action research is scientific method of action oriented study for getting guidance about our decisions and activities for improving and applying them in a proper way. eg. To find out the problems faced by students solving Algebraic equations and to suggest remedies.

Action research means the research about problem in teaching learning process faced by the teachers in their day to day life.

### 7.7 Difference between types of Educational Research

<table>
<thead>
<tr>
<th>Fundamental Research</th>
<th>Applied Research</th>
<th>Action Research</th>
</tr>
</thead>
<tbody>
<tr>
<td>Related to principles, rules and theories of Education</td>
<td>Related to day to day professional life of Education</td>
<td>Related to Education field</td>
</tr>
<tr>
<td>Not concerned with utility and applications but it deals with exploring the basic knowledge.</td>
<td>It is related to exploring and finding out 'why' and 'how' of issues in actual social life.</td>
<td>It is inclined to evaluating one's own development, daily situations and relevant improvements in it.</td>
</tr>
<tr>
<td>Main objective is to acquire knowledge and to create knowledge</td>
<td>Application of knowledge is main aim</td>
<td>It is more related to application than knowledge</td>
</tr>
<tr>
<td>Indirect impact</td>
<td>Direct impact</td>
<td>Immediate and direct impact</td>
</tr>
<tr>
<td>Generalization of findings</td>
<td>Findings are applicable to population</td>
<td>Findings are applicable to related sample only.</td>
</tr>
</tbody>
</table>

7.7 : Difference between types of Educational Research
Q.1 Rewrite the sentence choosing proper alternative from the following:

(1) Probable answer of the Research problem is _________.
   (a) Conclusion  (b) Hypothesis  (c) Variable  (d) Assumption

(2) A Representative group of a population for the Research means _________.
   (a) Method  (b) Sample  (c) Tools  (d) Variable

(3) Acquisition of knowledge is the main objective of _________.
   (a) Fundamental Research  (b) Applied Research
   (c) Action Research  (d) None of these

(4) Measurable thing in the Research title means the thing which can be measured is called as _________.
   (a) Sample  (b) Variable  (c) tools  (d) Hypothesis

Q.2 Explain the Concepts:

(1) Educational Research
(2) Variables in Research
(3) Sample of the Research
(4) Research population

Q.3 Complete the chart by using the proper word from the following bracket:

(1) (Knowledge Creation, Related to educational problem, Laws of learning, Direct use of Principle, Measurable fact of Research)

<table>
<thead>
<tr>
<th>Fundamental Research</th>
<th>Applied Research</th>
<th>Action Research</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

(2) Clear and meaningful arrangement of Research problem, total number of respondents, tool of data collection, tentative answer of problem, measurable fact of research, related to Industrial area.

<table>
<thead>
<tr>
<th>Questionnaire</th>
<th>Hypothesis</th>
<th>Population</th>
<th>Title</th>
<th>Variable</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td></td>
<td></td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

Q.4 Write Short Notes:

(1) Fundamental Research  (2) Action Research  (3) Applied Research

Q.5 Write the answer in brief:

(1) Explain the characteristics of Educational Research.
(2) Explain the Basic concepts of Educational Research.

Q.6 Write the answer in details:

(1) What is Educational Research? Explain the need of Educational Research.
(2) Make arrangement of fundamental concepts of educational research you have studied as per following subject.
   Title : Effect of student’s study habits of their educational achievement.
(3) Suggest different ways of solving problems faced in educational area.
Q.7 Distinguish between:
   (1) Fundamental Research and Applied Research
   (2) Fundamental Research and Action Research

Q.8 Note down your opinion according to the following factors:
   (1) For Educational development usability of Research is important.
   (2) Action Research is useful to solve the school problems
   (3) Research is helpful factor for Human development.

Q.9 Complete the following Flow Chart:

(1) Teaching-Learning

Areas of Educational Research

To Investigate

To Criticize

Research means

To Validate

Teacher Education

Curriculum

(2)
Meaning of Concepts of Educational Research is given in column ‘A’. Write the names of these concepts in column ‘B’.

### Column ‘A’

1. Arrangement of sub questions in the form of statements.
2. Measurable thing
3. Through which data collection is done
4. Total number of respondents
5. On which experiments are done

### Column ‘B’

- 
- 
- 
- 
- 

Q.10 Activities:

1. Make a list of problems in learning teaching as per subjects.
2. Prepare questionnaire for searching health related problems of school students.
3. Write your opinion on the importance of Educational Research.
4. Make a group of five students, prepare PPT on Educational Research and present it in the class room.
5. Prepare PPT on types of Educational Research and present in the class room,
6. Visit the following websites and make review of Research information available on websites related to Educational Research.
   1. http://www.mscert.org.in
   2. http://www.ncert.nic.in
   3. https://shodhganga.inlibnet.ac.in
   5. www.maa.ac.in

** * * **
Introduction

Education is a continuous process. The education system is also updated as per the changes occurring in human life. The trends which occur in our daily life, get reflected in the education system too. Today we are living in the world of information technology and its impact is seen in all the areas of our life. Consequently it has also impacted our education system. Information technology is used to make teaching-learning-evaluation effective thereby increasing the standard of our education. e-learning is one such new trend which guides and provides a direction in using technology effectively for learning. This new trend is discussed in this chapter.

8.1 e-learning: Concept and Characteristics

8.1.1 Concept

Let's Tell

From the following list which electronic tools do you use? (Make a ☑ Mark)

<table>
<thead>
<tr>
<th>Television set ☐</th>
<th>Tablet/Tab ☐</th>
<th>D.V.D. ☐</th>
</tr>
</thead>
<tbody>
<tr>
<td>Radio ☐</td>
<td>Smart watch ☐</td>
<td>CD ☐</td>
</tr>
<tr>
<td>Mobile ☐</td>
<td>Printer ☐</td>
<td>Pendrive ☐</td>
</tr>
<tr>
<td>Laptop ☐</td>
<td>Scanner ☐</td>
<td>Memory card ☐</td>
</tr>
<tr>
<td>Computer ☐</td>
<td>Digital camera ☐</td>
<td>Projector ☐</td>
</tr>
</tbody>
</table>

Keep in Mind

Learning which takes place with the assistance of electronic tools is called as e-learning.
Discuss

For what purpose do you use the above tools? What are their benefits?

Complete the Diagram

Limitations of e-learning

- Irregular electric supply
- Untrained human resources
- Lack of proper guidance
- Lack of human interaction
- Financial considerations
- Lack of physical resources

8.1 : Limitations of e-learning

8.1.2 Characteristics

e-learning takes place with the help of the computer and internet. The smartphone is also a form of modern computer and it is easily available anywhere. The easy availability of the computer and the internet everywhere has helped universalization of e-learning. e-learning is complementary to the traditional form of learning.

Complete the following figure and then explain in brief the characteristics of e-learning.

Complete the Diagram

Characteristics of e-learning

- Benefit of access to knowledge of international experts
- Unlimited treasure of knowledge
- Learning at your own speed
- Use of varied media

8.2 : Characteristics of e-learning

8.2 e-learning Tools:­

8.2.1 Online Tools:­

Let's Recall

- Write down the names of the websites you know.
  - www.maharesult.nic.in
  - www.mhrd.gov.in
  - www.ebalbharati.in
  - www.google.com
Do you Know?

- There are more than 100 crore websites in the world. (www.internetlivestats.com)
- The first website in the world was published in the year 1991.
- In the website address https:// and http://, the letter ‘s’ indicates that the website is more secured.
- Websites having the extensions ‘.ac’, ‘.gov’, ‘.edu’, indicates that these websites are academically more reliable.

Remember it

8.2.1.1 Website:

A collection of pages on the world wide web which has a common address, specific content is called as the website. Learning that occurs through the website is called as web based learning. This type of learning is called as e-learning or online learning. Institutions that offer online courses conduct all the processes right from admission to the result through their website.

8.2.1.2 Mobile Apps:

Put ☑ Mark, from the following which mobile apps do you use?

- Whatsapp
- Facebook
- Instagram
- Antivirus
- Google maps
- Educational apps
- Photo editing
- Online ticket booking
- email
- On-line shopping
- Twitter
- Youtube
- QR code reader
- Dictionary
Think and Share

Which mobile app do you use the most? Why?

Do You Know?

Mobile App is a type of application software which can be used specifically on the mobile only. In a smartphone various facilities are given through various Mobile Apps. eg. educational games, photo, maps, social media, health, shopping, entertainment etc.

Search and Complete the Table

Write names of three mobile apps for each of the following given subjects:

<table>
<thead>
<tr>
<th>Sr.No.</th>
<th>Subject</th>
<th>Name of the App</th>
</tr>
</thead>
<tbody>
<tr>
<td>(1)</td>
<td>Marathi</td>
<td></td>
</tr>
<tr>
<td>(2)</td>
<td>Hindi</td>
<td></td>
</tr>
<tr>
<td>(3)</td>
<td>English</td>
<td></td>
</tr>
<tr>
<td>(4)</td>
<td>Science</td>
<td></td>
</tr>
<tr>
<td>(5)</td>
<td>Mathematics</td>
<td></td>
</tr>
<tr>
<td>(6)</td>
<td>History</td>
<td></td>
</tr>
<tr>
<td>(7)</td>
<td>Geography</td>
<td></td>
</tr>
<tr>
<td>(8)</td>
<td>Drawing</td>
<td></td>
</tr>
<tr>
<td>(9)</td>
<td>Craft</td>
<td></td>
</tr>
<tr>
<td>(10)</td>
<td>Physical education</td>
<td></td>
</tr>
<tr>
<td>(11)</td>
<td>Dictionary</td>
<td></td>
</tr>
<tr>
<td>(12)</td>
<td>Encyclopedia</td>
<td></td>
</tr>
</tbody>
</table>

Discuss

How can e-learning take place by using the above apps?

Remember it

Which facts from the following do you know? (Mark)

(1) Downloading an app from an authorized play store is secure. ☐
(2) Every mobile app collects and saves all the information available in our mobile with our permission. ☐
(3) The security and confidentiality of the information in our mobile can be at risk due to mobile apps. ☐
**Limitations of e-learning through mobile app:**

- Doubt regarding the reliability of information
- Expensive
- Excessive use and Addiction

8.4 : Limitations of e-learning through mobile app

**8.2.1.3 e-library**

*Let’s Recall*

Have you ever experienced that you were not able to get a particular book from the school/college library and had to return empty handed? What could be the possible reasons of unavailability of the book?

*Complete the Diagram*

**Limitations of facilities in a traditional school/college library**

- Specific working hours
- Limited number of periodicals
- Books could be torn, lost or scrapped
- Availability of only printed materials
- Timebound availability of books

8.5 : Limitations of facilities in a traditional school/college library

*Imagine and Discuss*

- You are able to get the desired book at the desired time.
- You don’t have to worry regarding handling of the book.
- You have access to variety of books of various publications even on holidays.
Books of wellknown authors both national and international level are available free of cost.

Multimedia books are available along with printed books.

There is no hurry to return the books.

There is no worry about books getting torn or decayed.

You have the facility to carry and read the books anywhere any time.

Library which has all the above mentioned benefits and which can be accessed through various online media via the internet is called as e-library. It stores and provides e-books. e-library provides e-books to its readers through a specific website and apps. Some e-libraries provide services free of cost while some offer paid service. e-library provides various sources of knowledge like e-books, e-videos, documentaries, short films, movies, audios, animations, etc.

**Websites of Some e-Libraries**
- www.nationallibrary.gov.in
- https://unesdoc.unesco.org
- www.inflibnet.ac.in
- www.cart.ebalbharati.in/

With the help of your teacher take membership of any e-library and share your experience with the class.

**8.2.1.4 Blog**

Any individual can communicate his/her thoughts and knowledge with the people through website. But they might face the following difficulties while doing it.

- Expenditure has to be incurred for developing a website.
- Expenditure has to be incurred for publishing a website.
- Annual charges are to be paid to renew the publication of the website.

For overcoming these difficulties the online publication tool, namely ‘Blog’ is used.

The term Blog has been derived by joining the two words namely web + log. Web refers to the internet and log means writing a detailed record of the day to day work.

Thus, Blog literally means an informally written record of the day to day activities.

**Characteristics of a Blog**

- Blog can be called as a personal website.
- Blog is a free of cost available facility.
- The information on the blog can be published in the form of words, pictures, video as well as links.
- The copyright of the information published on the blog is held by the individual himself.
- The information published on the blog is called as ‘Post’.
- It is possible to edit or delete any post.
- It is possible to change the design, layout and title of the blog at anytime.
- There is a facility for the readers to make their comments on every post. All the rights to publish the comments made on the post lies with the owner of the Blog.
- The name and address of the Blog can be decided by the owner.
Limitations of a Blog

- Blogs do not appear in the search engines very easily.
- It is necessary to verify the reliability of the information given in the blog.
- Less facilities are available in a blog as compared to the websites.

See carefully

To understand the difference between a website and a blog one should carefully read the ‘URL’ along with the address.

eg. Website :- http://www.mahasscboard.in/ blog :- http://punetrekss.blogspot.com

Benefits of learning through blog

- Facility for posting queries and responses.
- Benefit of experience of common man
- Availability of variety of content
- Learning at one's own pace and convenience
- Opportunity of multisensory learning due to variety of media
- No limitation of place and time

8.6 : Benefits of learning through Blog
Let's Tell

Which wiki websites have you visited for collecting different types of information?

Understanding the Concept

Wiki is a publication tool available on the internet. It has a facility for modifying the information published on the website. Wiki is called as a collaborative website because every reader can contribute to the information on the website in the form of text, pictures, figures, graphs, maps, etc. eg Wikipedia - In this form of wiki, readers all around the world have contributed to the knowledge related to various subjects/topics and thereby created a huge storage of knowledge.

Characteristics:
- Wiki is an online tool for creating collaborative knowledge.
- Any common reader can suggest modification or add to the knowledge on the Wiki.
- The right to modify or add to the published knowledge on the Wiki website remains with the owner of the website. The correction or suggestions are sent to the experts panel for their evaluation. The decision regarding correction in the published information is taken on the basis of the advice of the experts.

Advantages of learning through Wiki
- Benefit of the knowledge of the common man.
- Creation of a huge storage of knowledge.
- Availability of knowledge of various subjects.
- Opportunity for the reader to suggest corrections or additions.
- Creation of continuously updated knowledge.
- ...........................................
- ...........................................
- ...........................................

Remember it

Limitations of Wiki
- Since different readers make additions to the knowledge on the wiki, the reliability decreases.
- Since continuous changes take place in the information, the validity of the knowledge decreases.
- Since there is a lot of published/available information it becomes difficult to select appropriate information from it.
- Since the access to the content is freely available on the wiki it is likely that the cyber criminals may take its undue advantage.
- The information on the wiki needs to be verified from different sources.

8.2.1.6 Video Conferencing

Discuss
- Share your experience of a video call with everyone.
- Have you used the facility of conference call in a smart phone? If yes, share it with the class.

Let's Understand

Video conferencing refers to two or more individuals communicating with each other from different places through a video.

Use of Video Conferencing for Learning
- A teacher can teach students from different schools all over the world simultaneously.
8.7: Video Conferencing

- Students from different schools can communicate with each other through video conferencing.
- Teachers and experts from different schools can exchange their knowledge with each other.
- It is useful to develop a dialogue between educational administration, community, parents and different educational institutions.
- Overcoming the geographical boundaries, dialogue is possible among teachers and students from different schools all over the world.
- The traditional classroom is transformed into a virtual classroom.

Do You Know?

Following infrastructure/physical and technological facilities are necessary for video conferencing.

- Separate room
- Broadband Internet Facility
- Screen
- Speakers
- Microphones
- Seating arrangement
- Computer

8.2.1.7 Social Media

Share it

Which from the following social media have you used?
- Facebook
- Instagram
- Whatsapp
- Twitter
- YouTube
- ........

Discuss

What are the uses of social media in our daily life?

Even this can Happen

- Quality learning can take place by becoming a member of various educational groups on social media.
- We can communicate with our teachers through social media and take their help in our learning.
• We can give educational and personal help to our family, relatives and friends through groups on social media.

• Important documents, educational updates and news, important information, links of educational websites, can be shared via social media.

Remember it

Social media is a medium which provides the facility of communicating with two or more people using text; pictures, symbols, video, audio etc. at one and the same time.

Share it

From the following for which reasons do you use social media?

• Educational
• Family
• Social
• Individual
• Communicating with friends

........

If you are not using social media state the reasons :-

• Financial condition
• No permission from parents
• Lack of internet facility
• Do not feel the need for using
• Other

8.2.2 Offline Tools

In absence of internet can computer be used for education?

Remember it

Those facilities available on the computers which can be used without the internet are called as off-line facilities.

8.2.2.1 Educational DVD

Have you used educational DVD before?

If yes, write their names.

• ......................
• ......................

You Should Know

• Educational DVD's are primarily based on various subjects in the curriculum. Also some are based on Value Education, Health Education, Moral Stories, Poems, Physical Education too.

• Educational DVD’s can be seen using computer or DVD player.

• Entertaining multimedia is effectively used in these DVD’s using text, pictures, animation, sound, symbols, videos, etc.

8.2.2.1 Educational Computer Games

Let's Recall

Which is your favourite video game?

Remember it

Games developed on a specific subject with specific educational objective are called as educational computer games. These games can be played on the computer. Educational computer games help in developing skills/competencies like decision making, discrimination, logical thinking, concentration, etc.
8.3 e-content Development:
Concept and Steps

Think

Which from the following things have you done?
- Reading e-books
- Watching video
- Use of interactive software
- Use of educational DVD

Remember it

- Data available in various digital tools is in electronic form. This is called as e-content.
- e-content can be in the form of text, pictures, diagrams, charts, animation, sound, video, etc. e-content is made available to the students through various digital tools.

8.3.1 Concept

A teacher develops e-content with the help of researchers and technicians. A teacher through research establishes the validity and reliability of the e-content. The help of the technician is taken to present the e-content in the form of multimedia.

8.3.2 Steps

There are many models of e-content development out of which the ‘ADDIE’ model developed by Florida State University, USA is the widely known model of e-content development. The term ‘ADDIE’ is derived from the first letter of each of the words that describe the steps of the model namely - Analysis, Design, Development, Implementation and Evaluation.

(I) Analysis: It is the first step in e-content development. The content which is to be converted into e-content form is analyzed considering various criteria - Unit, Subunit, Concepts, Rules, Principles, Cause-effect relationship and are correlated with the objectives and evaluation. The multimedia which may be required are also taken into consideration.

8.8: Characteristics of Educational Computer Games

8.9: e-content Developers
(II) **Design**: The maxims of teaching are considered while presenting and arranging the content. eg. From easy to complex, from part to whole, from known to unknown, etc. A balance and synchronization between the arrangement of units and technology is maintained and the content is designed. By taking the help of computer experts and researchers the design of the e-content is made perfect.

(III) **Development**: Using software the e-content is developed as per the design. Teachers and computer experts together transform the content in the form of e-content and its reliability and validity is examined.

(IV) **Implementation**: After the e-content is developed it is actually implemented on the students. Students are given orientation regarding handling/using the e-content. The necessary hardware and software is also made available.

(V) **Evaluation**: In this step how much learning of the student has taken place after using the e-content is assessed. Both formative and summative evaluation is done. In this step the effectiveness of the developed e-content is determined.

### 8.4 Cyber Security: Concepts, Threats and Remedies

#### 8.4.1 Concept:

Computer and internet together make the cyber world. People using the internet are the citizens of the cyber world. There are many cyber criminals in this world. They commit various crimes by misusing technology. Awareness regarding control and solutions for getting security from these criminals is called as cyber security.

**Recall it**

From the following which news have you read/heard?

- Tricked/deceived via email by offering attractive prizes.
- Tricked/cheated via fake account on social media.
- Loss of crores of rupees due to hacking of the bank server.
- Data of thousands of accounts on social media stolen.
- Cheated for thousands of rupees by use of fake credit/debit card.

**Remember it**

- The number of users of the internet is increasing tremendously.
The number of on-line transactions is also increasing significantly.

The percentage of on-line shopping is increasing day by day.

Digitalization in all areas of life is being initiated.

**Have you tried this?**
- On-line shopping
- On-line payment
- On-line billing
- e-banking

### 8.4.2 Threats and Remedies

#### (I) Financial threats

There is a possibility of being cheated at various stages of on-line transactions. Cyber criminals use various ways like hacking passwords, making fake debit/credit cards, misusing information about bank accounts by stealing mobiles, making fake accounts and getting information about bank accounts through fake calls or SMS and stealing money etc.

### Safety from financial threats

- Do not share and information of bank accounts through phone, SMS or email.
- Do not save user name and password. Remember them.
- Verify reliability of mobile app or website before making any on-line payment.
- Change the password regularly.
- Do not make any transaction with unknwon person on social media.
- Avoid making on-line transactions through public network, cyber cafe, free wi-fi.
Discuss

- Have you experienced mental harassment on social media?
- How many friends do you have in real life and on social media?

(II) Psychological threats
- Spending too much time on the internet may cause psychological threats.
- Cyber bullying means mental harassment on social media by individuals or groups following a specific ideology through the use of abusive words. Sometimes threats are given to life also. It may result in tremendous mental stress.
- Due to continuous use of internet, people get addicted to the cyber world. They start moving away from the real world; and remain isolated or alone. There is a loss in confidence in dealing in social situations.
- An individual wants to get everything on a click in the real world, as it is happens in the cyber world. Consequently patience and tolerance starts decreasing and the individual may go into depression.

Safety from psychological threats
- Use the internet for limited time.
- Do not avoid mixing with people in real life.
- Have interactions with family and friends.
- Do not react/respond to any controversial content on social media.
- Do not ‘like’ or ‘forward’ hate creating posts.
- Do not ‘like’ or ‘forward’ any posts regarding discrimination of caste, religion, politics, region etc.

(III) Physical threats
If a lot of time is spent in the cyber world, physical movements get restricted which may lead to health problems. Since many things can be done online now, actual/face to face interactions and transactions are becoming less and less.

Complete the List

Physical threats
- Muscles become weak since physical movements are decreasing.
- Obesity increases.
- Psychomotor skills do not get developed properly. Sports are neglected.

Safety from Physical threats
- Use internet only for a specified time.
- Play outdoor games.
- Do face to face/actual/offline transactions wherever possible.

(IV) Threats to Identity
Creating a fake account in the cyber world using someone else's photograph and name is called as ‘stealing identity’.

We upload our many photographs online, which are available to everyone. Such photographs are downloaded by cyber criminals to create fake profiles and commit crimes.

Contemplate

Till now you have shared which photographs on the internet and with whom?

Safety from threats to Identity
- Avoid giving unnecessary personal details on the net. Give only limited information.
- Do not give details regarding birth place, birthdate, address, education etc.
• Do not upload individual photographs on the net. Group photographs can be shared.
• Make appropriate setting on social media sites so that our information/photographs are visible only to our friends.

(V) Threats to the confidentiality of Data

Read the details of permissions of mobile apps carefully and discuss.

Keeping the moving information in the cyber world confidential is one of the challenges to the technicians. Day by day it is becoming more and more difficult to maintain privacy of information of individual customers on the different website databases. Cyber criminals make cyber attacks on the websites of different banks, institutions and steal individual information and use it for committing various cyber crimes.

Mobile apps too gather individual/personal information on the mobile through different permissions, due to which there is a threat to individual confidentiality.

Safety of confidentiality of data

• Keep minimum number of apps on your mobile. Delete unnecessary apps. If they cannot be deleted either ‘disable’ them or ‘forcefully stop’ them.
• Verify the reliability of websites before providing individual / personal information.
• Keep ‘username’ and ‘password’ confidential.
• Do not make friends with strangers on social media.

Let’s Tell

Which online games have you played where you were a part of a team?

(VI) Threats of Destructive Games

There are many entertaining games in the cyber world. Various tactics are used so as to encourage maximum number of people participate in them. There are many games which take undue advantage of depression among people. There are also destructive games which include fights, attacks, include firing, bombing, killing animals and birds, harming oneself, etc. There is a possibility of developing a ‘criminal mindset’ by playing such games.

Safety from Destructive Games

• Focus on playing actual games in real life.
• Have a dialogue with family and friends who can be of actual help to you if you are suffering from depression.
• Play constructive games which require brain storming.
• Read biographies of famous personalities and try to find out how they successfully resolved the problems faced by them.

Share it

If you have suffered harassment on social media, share it.

(VII) Threats from social media threats

• Social media has become a need today’s life. The members of facebook are over 300 crores. From this, one can understand how much social media has become popular. Instagram, Youtube, Whatsapp, Snapchat, Tic Toc, etc. social media are used widely even in India.

There are following threats of Social Media.

• An individual can be harassed collectively using social media. This is termed as ‘trolling’. An individual may be targetted
by a group if he/she has commented on any socially, politically or religiously relevant aspect, which is opposed to by the group. The person is trolled by use of abusive words, insulting comments, etc.

- Keeping a track on every act of an individual on social media is called as ‘Cyber Stalking’. The information regarding the individual is continously tracked and is used for committing crimes. eg. If an individual shares his ‘live location’ on the social media, and if it is realised that he is not at home, there is a possibility of theft being committed at his/her residence.

- Too much use of social media may make the person addicted to it. Unless and until they open their accounts and chat with people on social media, they become restless. There is a possibility of they becoming mental patients suffering from mental illnesses. eg. FOMO (Fear of Missing Out). In this illness the individual constantly fears of remaining ignorant of important events, comments, posts, etc. To remove this fear, the person stays on-line continuously.

- If one makes friends with strangers on the social media, it is quite likely that various crimes like stealing information, downloading of photographs, creating fake account, blackmailing etc. may be committed.

- More time is spent on social media, and less time is available for day to day functions. Hence time available for art, sports, entertainment, study, exercise, family, friends etc. becomes less and less.

- Go to the ‘Help Center Menu’ available on social Media and read the information regarding the Do’s and Don’ts. Discuss in the class.

**Safety from social media threats**

- Use your words carefully if you are commenting on any controversial topic on social media.

- ‘Like’ or ‘Share’ only those posts about which you are confident and you agree with.

- Communicate to your parents if you are being ‘trolled’ or ‘stalked’ on social media.

- Take care that you do not get addicted to social media. Use social media only for a specific time, by keeping a control on yourself.

- Take care that your interactions with your family and society do not get reduced due to excessive use of social media.
Q.1 Select the appropriate alternative and fill in the gaps :-

(1) e-learning means .................
   (a) learning through mobile  (b) learning through website
   (c) learning by reading blogs  (d) All of these
(2) The first website in the world was published in the year .................
   (a) 1999  (b) 1995  (c) 1991  (d) 2001
(3) From which of the following forms is the literature (material) not available in e-library?
   (a) e-book  (b) documentary  (c) video lectures  (d) printed books
(4) From which two words has the word ‘Blog’ been derived?
   (a) web + blog  (b) web + login  (c) website + blog  (d) web + log
(5) From the following which is not a social media?
   (a) Facebook  (b) Android  (c) Instagram  (d) Whatsapp

Q.2 Complete the following figure

(1)

Q.3 Answer the following in brief.

(1) Explain the characteristics of e-learning.
(2) Limitations of learning using mobile apps.
(3) Explain the concept of e-library.
(4) Explain the characteristics of blog.
(5) Explain the concept of Wiki.
(6) Which are the technical facilities required for video conferencing?
(7) Explain the characteristics of educational computer games.
(8) Explain in brief the steps of e-content development.
(9) Explain cyber threats in brief.
Q.4 Answer in detail :-

(1) Write a note on any educational mobile app using the following points :-
   (a) Name and creator of the App.
   (b) Technical information about the App.
   (c) Facilities available in the App.
   (d) Educational implications of the App.

(2) Visit an ‘e-library’ website on-line and write its facilities.

(3) Visit an educational blog on-line and write its educational implications.

(4) Prepare a list of questions which you would ask to students in the USA via video conference.

Activity :-

(1) Prepare posts on whatsapp on the following topics :-
   (i) Safety measures to be taken while doing financial transactions on-line.
   (ii) Psychological threats arising out of excessive use of social media.
   (iii) Threats arising out of playing destructive games on computer.

(2) Discuss with the parents of one of you friends on the following topic and write its report.
   (i) Mobile - need or addiction.
   (ii) Social media - Educational uses.
   (iii) Cyber security

(3) Prepare a poster using a Mobile App on the theme - ‘Precautions to be taken while using Social Media’.

* * *
Introduction

Students’ progress depends on their study habits. Students get encouragement about study from many people. Along with encouragement, people often tell students – ‘Do study’, ‘Plan your studies’, but how to do this? This is the real problem of students. Once the student understands that he could do it, he puts in all the required efforts to achieve success under any circumstances.

Issues faced by students while planning their studies include main issues like school timings, tuition timings, exams, school and family environment, unavailability of books. In view of all these things and to offer ‘success mantra’ to students, this unit of study for knowledge is given here.

9.1 Why to Study?

Observe and Discuss

Observe the following images and enlist the reasons of changing scenarios. According to you, what is the reason with maximum impact?

9.1 : Changing life style

Goal: It is necessary to be aware of the goal of life after completing formal education. Goal, which is huge and extensive can be achieved through rigorous and continual efforts. If the goal is set while pursuing education, the journey could be happier and successful.

In order to achieve the goal, it is necessary to set and plan specific objectives while studying. Objectives mean various efforts taken to achieve the goal. Following are the reasons why students should study –

- For acquiring knowledge and information
- For excellent success in examination
- For attaining good study habits
- For educational progress
- For livelihoods and professional progress
- For enhancing standard for living
- For becoming a successful individual
- For a happy and contented life
- For personality development

9.2 What are the resources for study?

9.3 How to study?

9.4 Where to study?

9.5 When to study?
9.2 What should be the resources for study?
(1) Text books (2) Reference books (3) Self written notes (4) Newspapers (5) Periodicals
(6) Audio-visual resources (7) On-line resources (8) Off-line resources (9) Field visits etc. are resources for study.

- According to you, what should be the priority of using resources listed above for studying?

In order to start self-study, the key question is how to start the study, or how to study. Let us see how to study by using all the resources mentioned above.

(1) Textbooks
Using Text book for study:

Let us understand how to study the text book. Text book is an important resource for study. Each chapter from the text book should be read carefully and the content should be comprehended. If the content is in form of images, diagrams, charts, then it should be comprehended accordingly. In order to understand the meaning of difficult words, concepts that occur while going through the content, those should be discussed with teachers as well as appropriate reference books should be referred. Educational content of the chapter should not be studied just in form of question-answers, but should be comprehended in a wholesome manner. Chapter wise exercises should be solved after studying the chapter. Use of Guides should possibly be avoided because study done through self-study method lasts longer and helps further study.

Go through new text books, read and study carefully activities like recall a little, give it a thought, try it, list it, complete the chart, discuss, observe, express your opinion etc.

Reading text book in classroom teaching:

Text books are regularly used in daily classroom teaching. Use of text books in classroom is dependent on the teaching subjects i.e. for language subject teaching, it is necessary that students have their text books with them. Similarly having text book is essential for learning other subjects as well.

While reading the text book, it is not expected to just read the key units, subunits and key concepts. Deep reading and immediately discussing with subject teacher the part of chapter or content in case not understood and seeking their appropriate guidance, is possible. Also, it is important to write appropriate notes while reading the text book in classroom teaching.

(2) Reference books
Using reference books for study:

When books are created, the content is included as per the need. For detailed and better understanding of content, for understanding deeper meaning of difficult words, technical words, conceptual terminologies as well as to understand comprehensiveness of the content, use of books as well as literature proves to be more effective.

Reference books help the student to understand content of the text book in more detail, with ease as well as to understand more information easily. Hence a list of reference books is given in every book so as to enable student gain detailed information.

If more than one reference books are available for a text book or for a chapter from a text book to have concept clarity, those can be used appropriately for better ease in comprehension of the content. Reference books guide the students.

(3) Self-written notes
Short but meaningful notes / notes taking:

Taking notes means writing important points of the subject under study for memorizing. Notes are of two types. One- notes taken during classroom teaching and second – notes taken for each chapter after reading the text book.

Taking notes while classroom teaching is ongoing is helpful from the point of view of memorization because while revising or studying again, the notes from the classroom boost confidence and it helps to revise.

Memorizing through listening is proportionately less and memorizing through writing is more.

Brain is more active while taking short but meaningful notes in the classroom because both the activities - listening and writing are
being performed simultaneously by the student. Efficiency is more in this case.

For good study, short, comprehensible, meaningful notes taking is a good habit. Presentment of written notes and passages can be more effective by using charts.

While taking notes, those can be abridged by using diagrams and graphs.

While taking notes in the classroom or from the text book, those should possibly be written first in draft mode or by using a pencil. The draft work could then be written neatly by referring appropriate resources. Separate notebook should be used for each subject. Notes should be date wise. Empty space should be kept for making improvements to notes.

While taking notes from internet, the same information should be validated from more than one resources. Note the source and date of information. Content available on Internet websites, e-books, videos, audios, blogs and such media should be carefully comprehended and notes should be taken in one’s own language.

(4) **Newspaper**

For general knowledge it is important to read articles based on current affairs in newspaper.

While studying the text book, an article from a newspaper can be studied as a reference to understand meaning of a word or to collect some additional information in that context. It is not necessary to study the entire newspaper however for appropriate references, newspaper articles should be studied carefully.

- Which educational articles from newspaper do you read?

(5) **Periodicals**

While studying the text book, student refers to information and articles from various magazines and periodicals and attains deeper knowledge. Articles from magazines and periodicals have the experiences and related knowledge attained by the writer. So periodicals and magazines are considered to be the knowledge resources for experienced based deep knowledge.

(6) **Audio – visual resources**

Audio-visual resources make positive impact on study. CD, Doordarshan, UGC, History and other educational channels often telecast various educational programs. These programs offering guidance for different knowledge disciplines and useful for different age groups should be watched to seek help for one’s own study.

(7) **On-line resources of study**

- Fill in the information in the space below.

**On-line devices for study**

- Make List of the periodicals you read regularly. On which subjects have you read the articles from the periodicals? What is your learning?

- Which educational programs do you watch on TV? Make a list.

**9.2 : On-line resources for study**

Information on various subjects taught under different knowledge disciplines of your program, the diagrams, images along with their meaning, in easily comprehensible language and with number of examples is available on internet. It must be used appropriately for knowledge attainment. Information on the internet should be validated for its correctness.

The vast ocean of knowledge in the form of internet is available for learning.
9.3: Off-line resources of study

- How do you use offline resources for your study?
  Other than this, there are many other media for attaining information necessary for study.

9.4: Student-Teacher Interaction

- According to you, what is the importance of discussion in study as shown in the above image?

9.5: Field visit

- According to you, how can you collect information from such field trip?
9.3 How to study?

How deep and long lasting is your study of any subject, depends on many factors. The most important factor is – what is the method of the study. Normally, everyday classroom teaching and available resources are used to study. Using various resources skillfully is essential.

9.6: Sitting postures for study

From the above image, what is the appropriate posture for study? Mention and follow it yourself in your study.

**Study tricks**

While studying; use of various study tricks can be used to make the study easy and simple. Some of such tricks are as follows.

- Do long-term planning.
- Appreciate self
- Do self-reflection.
- Reward self.
- Establish physical and mental balance
- Use different information sources.
- Study through group-discussion
- Take rest.
- Fix up your place for study.
- Fix up your study time.
- Get rid of difficulties.
- Take follow-up regularly
- Draw diagrams.
- Practise consistently.
- Participate in field trip, picnic, exhibition

9.7: Study Tricks
Know Yourself

Before studying, one must know what is his/her learning style. With the help of list below, identify what type of learner you are.

- **Types of learners according to learning styles** -
  - Visual learners → images, diagrams, maps, charts, multimedia is preferred for learning
  - Auditory learners → audio and sound based auditory resources are preferred for learning
  - Kinesthetic learners → learning through doing is preferred
  - Linguistic-verbal learners → written or textual resources are preferred
  - Logical-mathematical learners → logical and mathematical resources are preferred
  - Social learners → real social observation based resources are preferred
  - Self-oriented learners → self-reflection and self-reliant learning resources are preferred

**Study Skills** - In order to study well, certain activities are essential for which some skills are necessary. Some of these skills are as follows:

- Active listening
- Choice of appropriate seating place for study
- Responding skills
- Questioning skills
- Rote learning
- Reading, Comprehension
- Do it yourself
- Taking notes
- Stress management

Use Your Brain

- What are different methods and techniques of study?

**9.4. What should be the place of study?**

It is important to have an engaged mind and concentration while studying. Retaining concentration also depends on the place we choose to sit for studying. Surrounding makes a positive or negative impact on the study.

Generally, following are the places for studying.

- Classroom
- Library
- School campus
- Home
- Study group
- A study room
- Specific place
- Other
Remember it

<thead>
<tr>
<th><strong>Do’s</strong></th>
<th><strong>Don’t’s</strong></th>
</tr>
</thead>
<tbody>
<tr>
<td>• Fix up study time for effective and impactful study.</td>
<td>• Studying in a chaotic situation</td>
</tr>
<tr>
<td>• Using mobile for academic work.</td>
<td>• Extensive and undesirable use of mobile, TV and social media</td>
</tr>
<tr>
<td>• Plan daily routine and time table for study.</td>
<td>• Waste of time</td>
</tr>
<tr>
<td>• Choose appropriate peer friend or study group</td>
<td>• Thinking that study is only for exams.</td>
</tr>
<tr>
<td>• Appreciate and encourage self.</td>
<td>• Laziness and carelessness</td>
</tr>
<tr>
<td>• Concentration, consistency, practice</td>
<td>• Continuous Complaining</td>
</tr>
<tr>
<td>• Discussions with friends</td>
<td>• Over confidence</td>
</tr>
</tbody>
</table>

9.5. When to study?

• **Discuss with your classmates.**

I get up at 4 am to study. I can study well early morning. My study is effective late night. It is peaceful. My study is effective in the evening. My study is effective in the afternoon.

9.9: Discuss with student friends

• Which time of the day do you find most effective for your study? Why?

Remember it

Out of 24 hours of the day, fix up the time for your study whenever you study with full concentration. Everyone’s study time with concentration could be different. For achieving success, consistent and regular study is important.

Do This

• Read the interviews of the meritorious students of Xth and XIIth of last three years published in newspapers. What inspiration did you get from these successful students?
